Repository Configuration Pages

https://campus.barracuda.com/doc/43222932/

This section describes the configuration options available on repositories. These can be viewed in one of two ways:

- Click the **Properties** menu option or toolbar button when a repository node is selected. From this view you can change only those configuration options that do not pose a risk of corrupting archived data.
- Click the **Configuration Wizard** when a repository node is selected to access the Wizard. Take caution when reconfiguring the repository to avoid corrupting the archive.
