

## Event Log

<https://campus.barracuda.com/doc/43223096/>

The following tables list the events that ArchiveOne can generate due to expected and unexpected events. You can configure the types of events generated using the [Event Logging](#) page of the [Status](#) node configuration page.

If you are using a third-party application that monitors Event Log entries, the last two columns in the following table give details of the extra data that ArchiveOne puts into the Event Log, both as string arguments and as binary data. All binary data is encoded as a sequence of 4-byte integers.

**Table 1. ArchiveOne Server Events.**

Event	ID	Strings	Binary
General message (the text of the message explains the meaning)	5	Text of message	
Service started	1025	Version string	
Service stopped	1026	None	
Bad service request	1027	None	
Exchange not found	1028	Server Name	
Non-specific error	1029	None	
Service Handler not installed	1030	None	
Service account does not have exchange admin rights	1031	None	
License check failed, as admin has not run	1032	None	
Evaluation license string expired, and has been removed	1033	None	
License string appears to be badly formatted	1034	None	
License string appears to be corrupt	1035	None	
License check failed	1036	Reason	
Unable to access the Configuration server add-ins share	1037	None	
Unable to write configuration information	1038	Data to be written	
MAPlinitailize failed	1039	None	
Colnitialize failed	1040	None	
License key version assurance expiration	1043	Failure description	
License check failed, wrong organization	1044	Failure description	
License check failed, wrong site	1045	Failure description	
License check failed, wrong server	1046	Failure description	

License check failed: Unable to count mailboxes	1047	None	
License check failed: Too many mailboxes	1048	Failure description	
License has expired	1049	None	
License check failed: previous expired evaluation detected	1050	None	
License warning: too many mailboxes	1051	Warning description	
Unable to create a MAPI Profile	1053	None	
Another Policy service is processing the Configuration server	1054	Name of server machine	
Service failed to register class objects	1055	None	
Failed to create file	1056	File name	
Policy run started	1057	List of policy names	
Policy run ended	1058	Number of mailboxes Number of folders Number of messages Number of attachments Number of hits	Number of mailboxes Number of folders Number of messages Number of attachments Number of hits
Policy run aborted	1059	Abort reason Abort code Number of mailboxes Number of folders Number of messages Number of attachments Number of hits	Abort code Number of mailboxes Number of folders Number of messages Number of attachments Number of hits
Archive run started	1060	Repository name	
Archive run ended	1061	Repository name Number of messages archived Number of messages examined	Number of messages archived Number of messages examined
Archive run aborted	1062	Repository name Error code	Error code
Archive run terminated by user	1063	Repository name	Error code
Service closed because a service on another machine is also processing the same Configuration server	1064	Name of other server hosting service	

Service closed because the service account does not have sufficient rights over the Configuration server (it must be a machine administrator)	1077		
Service closed because the service account is not a member of the local machines Administrators group	1078		

**Table 2. ArchiveOne Monitor Events.**

Event	ID	Strings	Binary
Monitor service started	1281	Version string	
Monitor service stopped	1282	None	
Monitor service aborted unexpectedly	1331	None	
ArchiveOne Service found to be unresponsive	1332	None	

**Table 3. ArchiveOne Manager Service Events.**

Event	ID	Strings	Binary
Data manager service started	2561	Version string	
Data manager service stopped	2562	None
