

## Database Tables

<https://campus.barracuda.com/doc/43223104/>

In the following database tables, all fields are **varchar** text unless otherwise stated.

**Table 1. Results stores the results of policies which correspond to the columns in the raw data of the results.**

ID	Unique Row Identifier
Store	Name of the store the item was found in - this can be a mailbox, PST or public folder
Path	Path where the item is found
Subject	Subject of the item
Attachment	The names of the attachments on the item found
NumberOfAttachments	The number of the attachments on the item found
Sender	The sender of the item found
Recipients	The recipients of the item found
DeliveryTime	The delivery time of the item found
MessageSize	The size of the item found in bytes
DeleteTime	The time the item was deleted - only relevant if searching the dumpster
PolicyRunID	Identifier of the policy run the item was found on

**Table 2. PolicyRunDetails stores the details of the policies when they are run.**

ID	Unique Row Identifier
Name	Name of the policy that ran
Details	The details of the policy which was ran
RunTime	Time the policy ran

**Table 3. C2CVersion stores the version of the database format.**

Version	Stores the version of the database format
