

Microsoft Exchange Server

<https://campus.barracuda.com/doc/43843588/>

The Yosemite Server Backup Agent for Microsoft Exchange supports backup and restore operations for Microsoft Exchange Server 2003 SP-2, Microsoft Exchange Server 2007 SP-1-3, Microsoft Exchange Server 2010 SP1-2, and Microsoft Exchange Server 2013.

Some editions of Yosemite Server Backup do not provide a license to back up Exchange data. By default, an evaluation version of the Yosemite Server Backup agent for Microsoft Exchange is installed automatically when you install Yosemite Server Backup on a Windows server machine running Microsoft Exchange. You can use this evaluation license for 60 days. To continue using the agent, contact your sales representative to purchase an edition of Yosemite Server Backup that supports application agents.
