

Self-Service VPN Provisioning on Microsoft Windows

<https://campus.barracuda.com/doc/43844636/>

For Windows devices, users can install VPN templates on their computer by clicking the VPN provisioning link in the **Settings** section of the desktop portal.

In this article

Before you Begin

- Configure the Client-to-Site VPN. For more information, see [How to Configure a Client-to-Site IPsec VPN with PSK](#).
- Configure VPN files using the *vpn file from the Client-to-Site VPN. For more information, see [How to Configure VPN Templates in the SSL VPN](#).

Self-Service VPN Provisioning on Microsoft Windows

1. Log into the SSL VPN desktop portal.
2. In the upper right-hand corner, click **Settings**. The **Settings** page opens in a new tab.

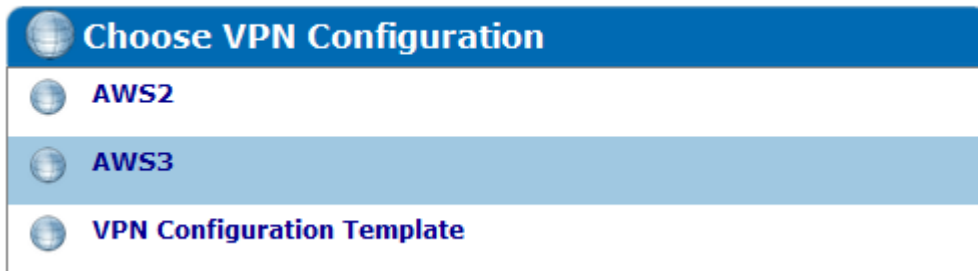

3. Click **Download Barracuda VPN**.

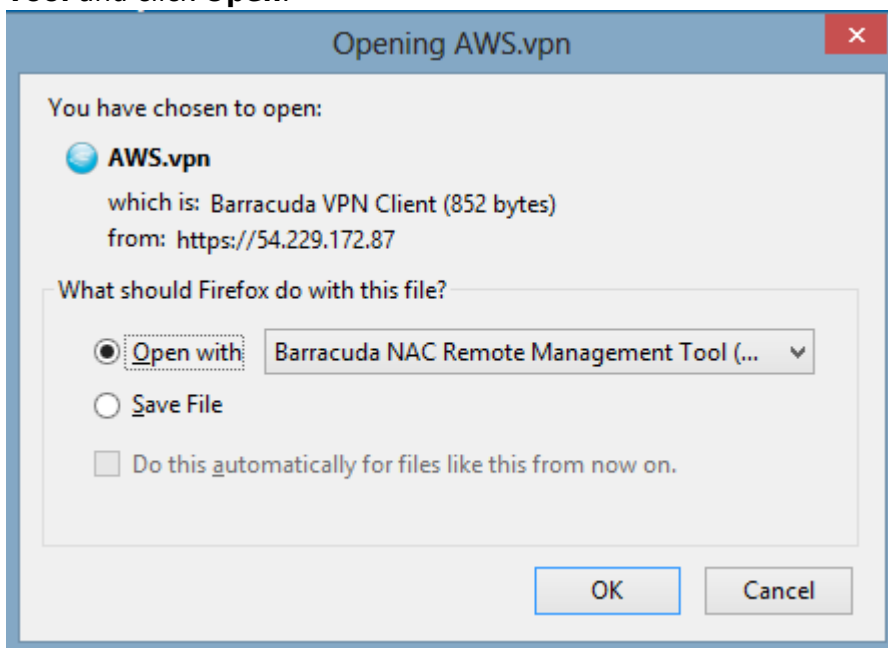

4. Click the VPN template you want to install. The **Open File** dialog opens.

Barracuda VPN uses its own Tina VPN protocol.

5. Verify that you are opening the VPN template with the **Barracuda NAC Remote Management Tool** and click **Open**.

The VPN template is now the default VPN configuration. You can now connect to the Barracuda NG Firewall via the Client-to-Site VPN.
