

## Hardware Models

<https://campus.barracuda.com/doc/43847114/>

The Barracuda NG Firewall is available in multiple hardware models that meet different networking requirements ranging from the Barracuda NG Firewall F10 for small or home offices to the Barracuda NG Firewall F1000 for large data centers.

When a hardware model is updated it is released as a new revision. For example the second version of the Barracuda NG Firewall F800 is released as the Barracuda NG Firewall F800 Revision B. When a new revision is launched the preceding revision is phased out. The sticker on the back of your Barracuda NG Firewall includes information on the model revision. E.g: **Rev.C** BAR-NG-123456.
