

SSH Tab

<https://campus.barracuda.com/doc/43847173/>

The **SSH** page provides access to the SSH console. To access the login screen for SSH, click the **SSH** tab located in the Barracuda NG Admin service bar.

You should only open an SSH connection to the Barracuda NG Firewall when you are performing software updates or special maintenance tasks. Otherwise, perform all routine administrative tasks in Barracuda NG Admin.

The screenshot shows the SSH Login interface. It has a dark blue background with white text and input fields. The title is "SSH-Login". There are three input fields: "Username:" with the value "root", "Password:" with masked characters, and a dropdown menu set to "UTF8". Below the fields is a "Login" button.

- For more information on SSH, see: [How to Configure SSH](#).
- For information about the command line interface, see [Command-Line Interface](#).
