

## How to Customize the Dashboard Page

<https://campus.barracuda.com/doc/45025307/>

This feature is available on the Barracuda Web Security Gateway 610 and above.

The **BASIC > Dashboard** page of the Barracuda Web Security Gateway provides overall performance statistics for the Barracuda Web Security Gateway for IT administrators to monitor the health of the system and to make sure traffic is flowing as expected. However, you might want to customize and limit or change the content displayed on the Dashboard. You can create multiple custom dashboards by clicking the [Manage Dashboards](#) link at the top of the page:

After you create one or more customized dashboards, clicking the [Show Dashboards](#) link displays links to all other dashboards.

**Example:** Create a dashboard to show web traffic related to social media activity in the Marketing department.

1. Click [Manage Dashboards](#) on the **BASIC > Dashboard** page.
2. In the **Manage Dashboards** window, name the dashboard **Social Media Activity**.
3. Give the dashboard a **Description** of **Facebook, Twitter and Gaming Activities**.
4. Choose **Marketing** for the **LDAP Group**.
5. For **Dashboard Elements**, you might choose:
  - Top 10 Facebook Users
  - Top 10 Twitter Users
  - Top 10 Users on Social Networking Sites
  - Top 10 Users on Gaming Sites

As you select each dashboard element, which is essentially a set of report data, you can drag and drop these elements where you want them to appear in the screen layout.

For details on designing your custom dashboard, click **Help** on the **BASIC > Dashboard** page to view the help page.
