

CC File Updates Page

<https://campus.barracuda.com/doc/45711529/>

The **CONTROL > File Updates** page provides an overview of the configuration file update status of available boxes administered by the Barracuda NG Control Center. From here, you can manage file downloads for all managed NG Firewalls and for the NG Control Center. You can also configure download settings for the updates. To access this page, open the **CONTROL** tab and click the **File Updates** icon in the ribbon bar.

In this article:

Information Display

The **File Updates** page shows the managed Barracuda NG Firewalls on which file updates were performed, shows the update status, and lists the update files.

Area Configuration

The **Area Configuration** dropdown list provides update settings for various firewall features, such as App ID definitions, IPS pattern updates, and SSL VPN templates. To configure update settings, select

the section from the dropdown list and click **Set Area Config**.

Status List

The status list shows the managed Barracuda NG Firewalls and displays the configuration update status divided into the following columns:

- **Box / Cluster / Range ID** – These columns display the name of the updated unit, and the cluster and range it belongs to.
- **Flags** – The update status can be verified in the **Flags** column.

Flag	Description	Comment
C	Complete Update	A full update with the complete configuration has been applied.
E	Update Error	Last update was not successful.
F	Force Update	The last update was forced, thereby overriding the internal scheduler.
U	Untrusted Update	Box and CC have not exchanged authentication data and, thus, have not approved trustworthiness.
T	Update Terminated	Update has terminated.
B	Update Blocked	Updates are blocked.
P	Update Pending	PAR file is ready to be sent.
S	Update Scheduled	Update has been scheduled.
A	Update Active	Update process is active.

- **Last Success** – Date and time of the last successful configuration update (the syntax used is dd.mm.yyyy-hh:mm:ss).
- **Last Try** – Date and time of the last attempt to update a configuration.
- **Tries** – Number of attempts to update the configuration of a Barracuda NG Firewall.
- **Reason** – Displays the status message (for example, the reason for a failed update).

Double-clicking an entry opens the **Detail** window that shows the download details and if the process was successful.

Available Actions

Right-clicking an entry offers the following actions:

- **Refresh** - Triggers a refresh of the update download process.
- **Restart Process** - Restarts the update download process.
- **Update Now** - Triggers an immediate box update.
- **Complete Update** - Triggers the sending of the entire box configuration to the box (not only the modified part of it).
- **Block Update** - Disables the possibility of performing a box update.
- **Unblock Update** - Enables scheduling of updates.
- **Initiate Download** - Starts the update download process.
- **Arrange Icons By** - Allows reordering the status list columns.
- **Tools** - Offers the standard list context menu.

Information Bar

The information bar shows the current download status and displays update information such as feature version and date.

File List

The file list shows all downloaded files and displays the following information:

- **Filename** - Name and path of the downloaded file
- **MD5 Hash** - Unique hash key of the downloaded file
- **Info** - Optional information
