System Health Email Notifications

https://campus.barracuda.com/doc/45712106/

This article refers to Barracuda Message Archiver Legacy Release firmware or higher.

You can set up SNMP access between the Barracuda Message Archiver and an SNMP monitor to query system information, and select whether to receive associated alerts, system messages, and notifications via email.

If you wish to receive device health email notifications, for example, system alerts, log in to the web interface and verify the following settings on the **BASIC > Administration** page:

- **Enable SNMP Agent** is set to **Yes**;
- **Enable SNMP Notifications** is set to **Yes**.

In the **Email notifications** section, enter the recipient email addresses in the provided fields for the required notifications. Click **Save** to save your changes.

If you *do not* wish to receive device health email notifications, for example, system alerts, log in to the web interface and verify the following settings on the **BASIC > Administration** page:

- Set **Enable SNMP Agent** is set to **No**;
- Set **Enable SNMP Notifications** is set to **No**.

Click **Save** to save your changes.
