

## How to Specify the System Health Report Email Recipient

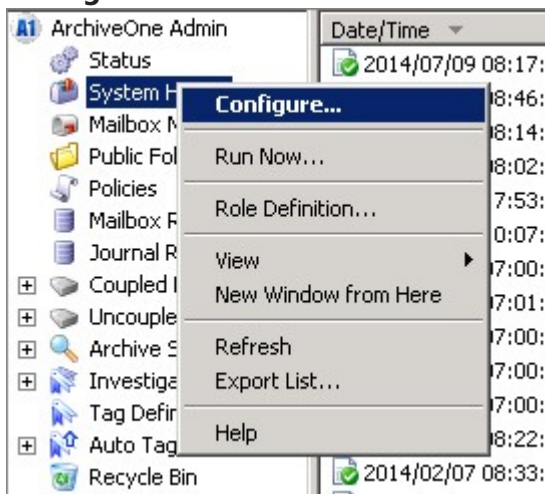

<https://campus.barracuda.com/doc/45712574/>

This article refers to the Barracuda ArchiveOne version 6.5 and higher.

System Health Reports are run daily, by default at 6:00 a.m. The system health tests include checks such as connectivity to Microsoft Exchange, search indexes, and archive repository retrieval. An email with the System Health test results can be sent to an individual or group of users.

To change the email recipient:

1. Open the ArchiveOne Admin Console, right-click the **System Health** node, and click **Configure**:

2. In the **System Health Configuration** dialog, in the **Notification Emails** section, type the email address of the individual or group who is to receive email notifications, separating multiple entries with a semicolon.
3. Click **Test Email**. Verify the recipients receive a test email from the ArchiveOne Service account.
4. Click **OK** to save your changes and close the dialog box.

The next time the System Health runs, the report is sent to the specified recipients.
