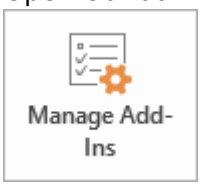
How to Enable Quick Link Client in Microsoft Outlook 2013

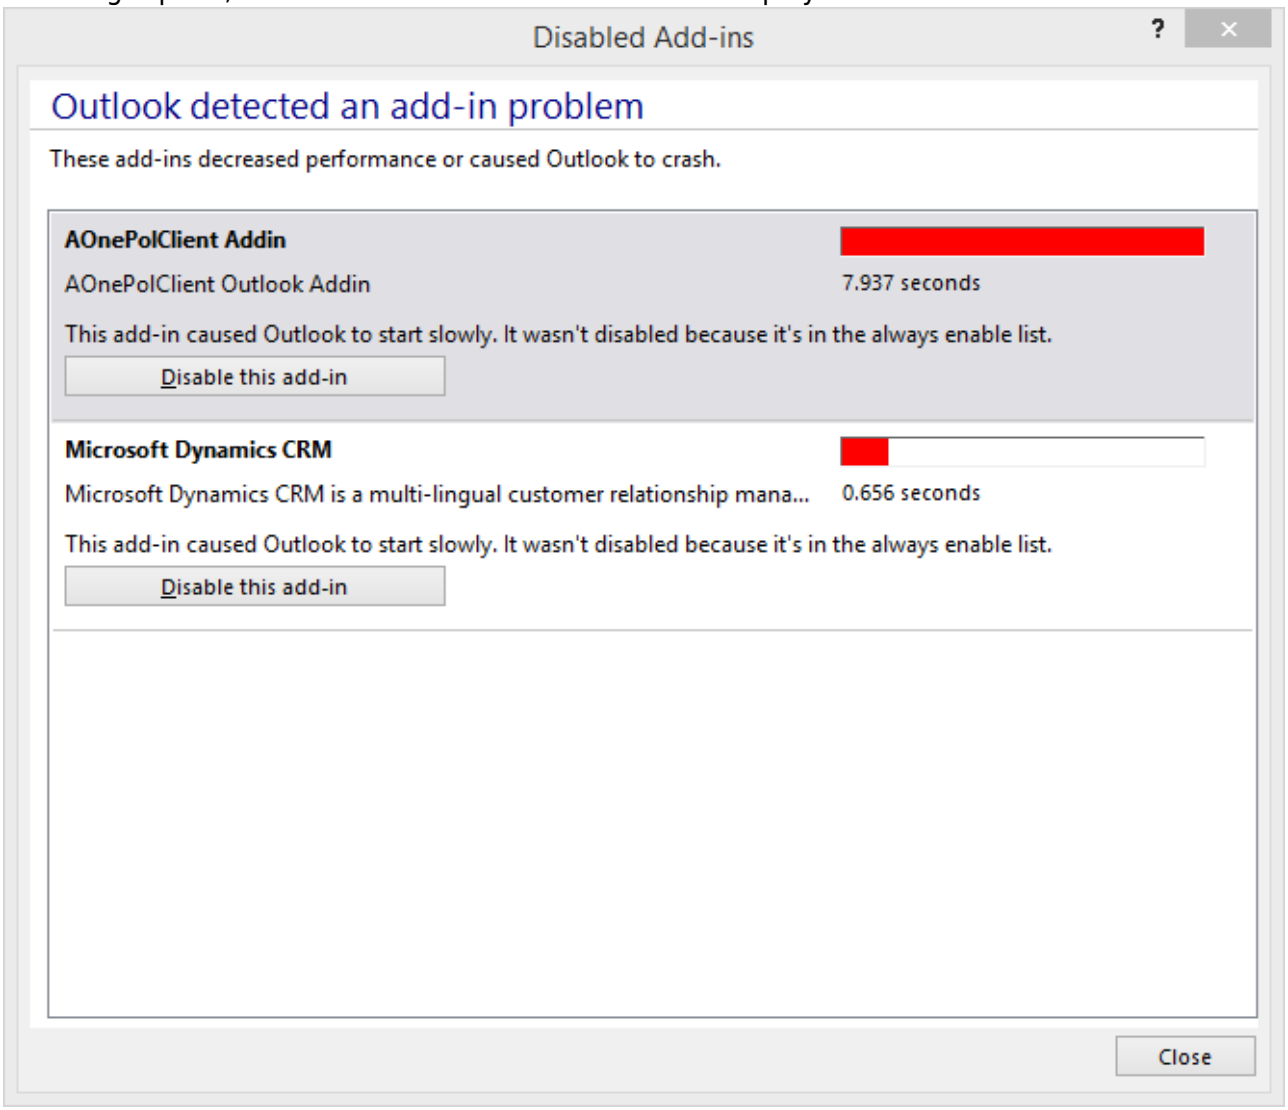
https://campus.barracuda.com/doc/45712824/

In Microsoft Outlook 2013, if the average startup time over the last five attempts to load an add-in is greater than one second, Outlook considers the add-in the cause of the slow startup and disables it. To determine if Outlook 2013 has listed an add-in as **Disabled**,

1. Open Outlook 2013, and click the **File** tab, and click **Manage Add-Ins**:



2. In the right pane, the list of slow and disabled add-ins displays:



3. If the **AOnePolClient Addin** displays as disabled, re-enable the Add-in so that you can double-click a message to retrieve it.
