

How to Install the Search and Retrieval Website on Small Business Server

<https://campus.barracuda.com/doc/45712991/>

The [Search and Retrieval website](#) is by default installed under **Default Web Site** in Internet Information Services (IIS) Manager. On a Windows Small Business Server (SBS), web applications must be installed under the **SBS Web Applications** site in IIS Manager to function correctly. Therefore, you must move the ArchiveOne web services after installation to the **SBS Web Applications** site. To do so, use the following steps:

1. On the ABA server, open IIS Manager.
2. Expand **Servername > Sites > SBS Web Applications** where **Servername** represents the name of the server.
3. Right-click **SBS Web Applications**, and click **Add Application**.
4. In the **Alias** field, type **AOneAudit**.
5. Click **Select**, and select the **Archive One** application pool from the drop-down menu.
6. In the **Physical path** section, browse to and select **C:\Program Files (x86)\Barracuda\ArchiveOne\Web\AOneAudit**.
7. Click **OK** to create the website.

Repeat the above steps for all ArchiveOne web services using the following Alias/Physical path combinations:

- Alias: **AOneEWS** / Physical path: **C:\Program Files (x86)\Barracuda\ArchiveOne\Web\AOneEWS**
- Alias: **AOnePolExtArch** / Physical path: **C:\Program Files (x86)\Barracuda\ArchiveOne\Web\AOnePolExtArch**
- Alias: **AOnePolFileAccess** / Physical path: **C:\Program Files (x86)\Barracuda\ArchiveOne\Web\AOnePolFileAccess**
- Alias: **AOnePolPstDiscovery** / Physical path: **C:\Program Files (x86)\Barracuda\ArchiveOne\Web\AOnePolPstDiscovery**
- Alias: **AOnePolQL** / Physical path: **C:\Program Files (x86)\Barracuda\ArchiveOne\Web\AOnePolQL**
- Alias: **AOnePolServerDetails** / Physical path: **C:\Program Files (x86)\Barracuda\ArchiveOne\Web\AOnePolServerDetails**
- Alias: **AOnePstManagement** / Physical path: **C:\Program Files (x86)\Barracuda\ArchiveOne\Web\AOnePstManagement**
- Alias: **AOneSearch** / Physical path: **C:\Program Files (x86)\Barracuda\ArchiveOne\Web\AOneSearch**
- Alias: **ArchiveOneWebAdmin** / Physical path: **C:\Program Files (x86)\Barracuda\ArchiveOne\Web\ArchiveOneWebAdmin**
- Alias: **BarracudaAdvancedDiscovery** / Physical path: **C:\Program Files (x86)\Barracuda\ArchiveOne\Web\AdvancedDiscovery**
- Alias: **WebAPI** / Physical path: **C:\Program Files**

(x86)\Barracuda\ArchiveOne\Web\WebAPI

Once all web services are created under the SBS Web Applications site, run the [System Health check](#) from the ArchiveOne Admin console to confirm the web services are operational. The System Health report tests access to all web services and confirms the services are responding as expected.
