
Configuration Panel

<https://campus.barracuda.com/doc/46205084/>

Use the Configuration Panel to configure cameras in your account.

Best Practices for Camera Configuration

1. Configure individual cameras for their initial setup, including adjusting settings including focus, zoom, and enabling the preview stream. As part of this configuration, specify the Location for the camera.
This step requires the Admin or Superuser role for the specific camera.
2. After the initial setup, control shared configurations by updating settings for the Location.
This step requires the Superuser role.
