

How to Disable IPv6

<https://campus.barracuda.com/doc/46206166/>

Microsoft does not recommend disabling IPv6; only disable this protocol under the advisement of a Barracuda Technical Support representative during network troubleshooting.

Note that when disabling IPv6 protocol on the network adapter connection settings, you may find that IPv6 is still running.

To disable IPv6, follow the instructions in the Microsoft Knowledgebase article [How to disable IPv6 or its components in Windows](#).
