

URL Filter

<https://campus.barracuda.com/doc/46209162/>

The URL Filter services on the Barracuda NextGen Firewall F-Series can use two web filter engines:

Barracuda Web Filter

The Barracuda Web Filter uses the online Barracuda URL category database and can be used in combination with Application Control and the HTTP Proxy service. A valid Energize Updates subscription is required.

For more information, see [Barracuda URL Filter](#).

Barracuda NG Web Filter

The Barracuda NG Web Filter uses a locally stored URL category database and requires a Barracuda NG Web Filter subscription. The NG Web Filter can only be used in combination with the HTTP proxy and is not compatible with Application Control.

For more information, see [Barracuda NG Web Filter](#).
