## Mobile Portal

<https://campus.barracuda.com/doc/46209269/>

The Barracuda NextGen F-Series SSL VPN mobile portal allows easy access to your organization's web resources (such as MS Outlook Web Access) for mobile devices like smartphones or tablets. When enabled on the Barracuda F-Series, users can access the mobile portal by entering the IP address or hostname of the SSL VPN service in the browser of their mobile phone or tablet. When logged into the portal, users can access web and Outlook Web Access resources as well as enable or disable dynamic firewall rules resources. You can limit access to each resource by configuring the Allowed User Groups for the resource.

### The Barracuda NextGen F-Series SSL VPN Mobile Interface

---

The Barracuda NextGen F-Series SSL VPN mobile portal provides a user friendly interface with a service bar where users can launch available web resources made accessible by the Barracuda NextGen Firewall F-Series. Users can navigate through the resources and add shortcuts to a favorites list.

For instructions on how to set up the Barracuda NextGen F-Series SSL VPN mobile portal, see [How to Configure the Mobile Portal](#) and [Mobile Portal User Guide](#).

### Additional Features

---

The Barracuda NextGen F-Series SSL VPN mobile portal provides access to dynamic firewall rules and lets you enable and disable the individual dynamic firewall rules on the F-Series. You can also set for how long the firewall rule is going to be enabled.

For instructions on how to use the Barracuda NextGen F-Series SSL VPN mobile portal, see [Mobile Portal User Guide](#).

### Supported Devices

---

The Barracuda NextGen F-Series SSL VPN mobile portal supports most of commonly used devices, e.g. Apple iOS, Android and Blackberry.

For more information, see Supported Mobile Devices section in [SSL VPN Supported Devices](#)
