

## Security Reports

<https://campus.barracuda.com/doc/47579485/>

Security reports cover web attack prevention activity performed by the Barracuda Web Application Firewall. For example:

- Number of attacks for categories such as forceful browsing, XSS injections, etc., for the specified service(s) and time frame
- Number of attacks on the service(s) within the specified time frame
- Number of attacks attempted during each hour of the specified day
- Top-attacked domains and URLs
- Top-attacking clients - top clients who attacked the services
- Top attacking region/country - top countries from which the attacks were attempted

The following table provides a detailed description of each report in the Security section:

| Report Name | Report Description | Graph/Chart Type | Data in Graph/Chart | Drill Down |
|-------------|--------------------|------------------|---------------------|------------|
|-------------|--------------------|------------------|---------------------|------------|

|                     |  |           |  |   |
|---------------------|--|-----------|--|---|
| Attacks By Category | <p>Displays the number of attacks for the categories such as forceful browsing, XSS injections, etc., for the specified service(s) and time frame. For more information on attack categories, see <a href="#">Attacks Description - Action Policy</a>.</p> <p>The following are the attack categories displayed in the report graph:</p> <ul style="list-style-type: none"> <li>• Forceful Browsing</li> <li>• XML Violations</li> <li>• Auth Attacks</li> <li>• Outbound Attacks</li> <li>• Session Tamper Attacks</li> <li>• Injection Attacks</li> <li>• SQL attacks</li> <li>• DDos Attacks</li> <li>• JSON Violation</li> <li>• Prototcol Violation</li> <li>• XSS Injections</li> <li>• FILE Attacks</li> <li>• Limits Violation</li> <li>• Other Attacks</li> </ul> | Bar Chart | <ul style="list-style-type: none"> <li>• <b>X</b> plots display the count of attacks corresponding to each attack category.</li> <li>• <b>Y</b> plots display attack category.</li> </ul>  | <p>Report can be drilled down by:</p> <ul style="list-style-type: none"> <li>• Services</li> <li>• Clients</li> <li>• Time stamp</li> </ul>                         |
| Attacks by Service  | Displays the number of attacks for the service(s) within the specified time frame.   | Bar Chart | <ul style="list-style-type: none"> <li>• <b>X</b> plots display the count of attacks corresponding to each service.</li> <li>• <b>Y</b> plots display the service IP address(es)</li> </ul>  | <p>Report can be drilled down by:</p> <ul style="list-style-type: none"> <li>• Domain</li> <li>• Time Stamp</li> <li>• Attack Category</li> <li>• Client</li> </ul> |
| Attacks by Hour     | Displays the number of attacks attempted during each hour of the specified day.  | Bar Chart | <ul style="list-style-type: none"> <li>• <b>X</b> plots display the count of attacks corresponding to each hour.</li> <li>• <b>Y</b> plots display the date and time in <i>Year-Month-Date-Hour</i> (i.e. YYYY-MM-DD HH:00) format for last 24 hours.</li> </ul> | None  |

|                              |  |           |   |   |
|------------------------------|--|-----------|---|---|
| Attacks by Day               | Displays the number of attacks attempted during each day of the specified month    | Bar Chart | <ul style="list-style-type: none"> <li>• <b>X</b> plots display the count of attacks corresponding to each day.</li> <li>• <b>Y</b> plots display the date in <i>Year-Month-Date</i> (i.e.YYYY-MM-DD) format.</li> </ul>  | Report can be drilled down by: <ul style="list-style-type: none"> <li>• Services</li> <li>• Attack Category</li> <li>• Clients</li> </ul> |
| Top-Attacking Clients        | Displays the number of attacks from the client(s) within the specified time frame. | Bar Chart | <ul style="list-style-type: none"> <li>• <b>X</b> plots display the count of attacks.</li> <li>• <b>Y</b> plots display the IP address(es) of attacking clients.</li> </ul>   | Report can be drilled down by: <ul style="list-style-type: none"> <li>• Services</li> <li>• Attack Category</li> </ul>                    |
| Top-Attacked Domains         | Displays top-attacked domains based on the requests received.                      | Bar Chart | <ul style="list-style-type: none"> <li>• <b>X</b> plots display the count of attacks.</li> <li>• <b>Y</b> plots display the name of attacked domains.</li> </ul>  | Report can be drilled down by: <ul style="list-style-type: none"> <li>• Time</li> <li>• Attack Category</li> <li>• Services</li> </ul>    |
| Top-Attacked URLs            | Displays top-attacked URLs based on the requests received.                         | Bar Chart | <ul style="list-style-type: none"> <li>• <b>X</b> plots display the count of attacks.</li> <li>• <b>Y</b> plots display the attacked URLs.</li> </ul>   | Report can be drilled down by: <ul style="list-style-type: none"> <li>• Time</li> <li>• Attack Category</li> </ul>                        |
| Blocked Requests by Services | Displays the number of requests blocked by each service.                           | Bar Chart | <ul style="list-style-type: none"> <li>• <b>X</b> plots display the count of blocked requests.</li> <li>• <b>Y</b> plots display the service IP address(es) that blocked the requests.</li> </ul>   | None  |
| Flagged Requests by Services | Displays the number of requests allowed by each service.                           | Bar Chart | <ul style="list-style-type: none"> <li>• <b>X</b> plots display the count of allowed requests.</li> <li>• <b>Y</b> plots display the service IP address(es) that allowed the requests.</li> </ul>   | None  |
| Attacked Services by Hour    | Displays the number of attacks on services for each hour of the day.               | Bar Chart | <ul style="list-style-type: none"> <li>• <b>X</b> plots display the count of attacks corresponding to each hour.</li> <li>• <b>Y</b> plots display the date and time in <i>Year-Month-Date-Hour</i> (i.e.YYYY-MM-DD HH:00) format for last 24 hours.</li> </ul> | None  |

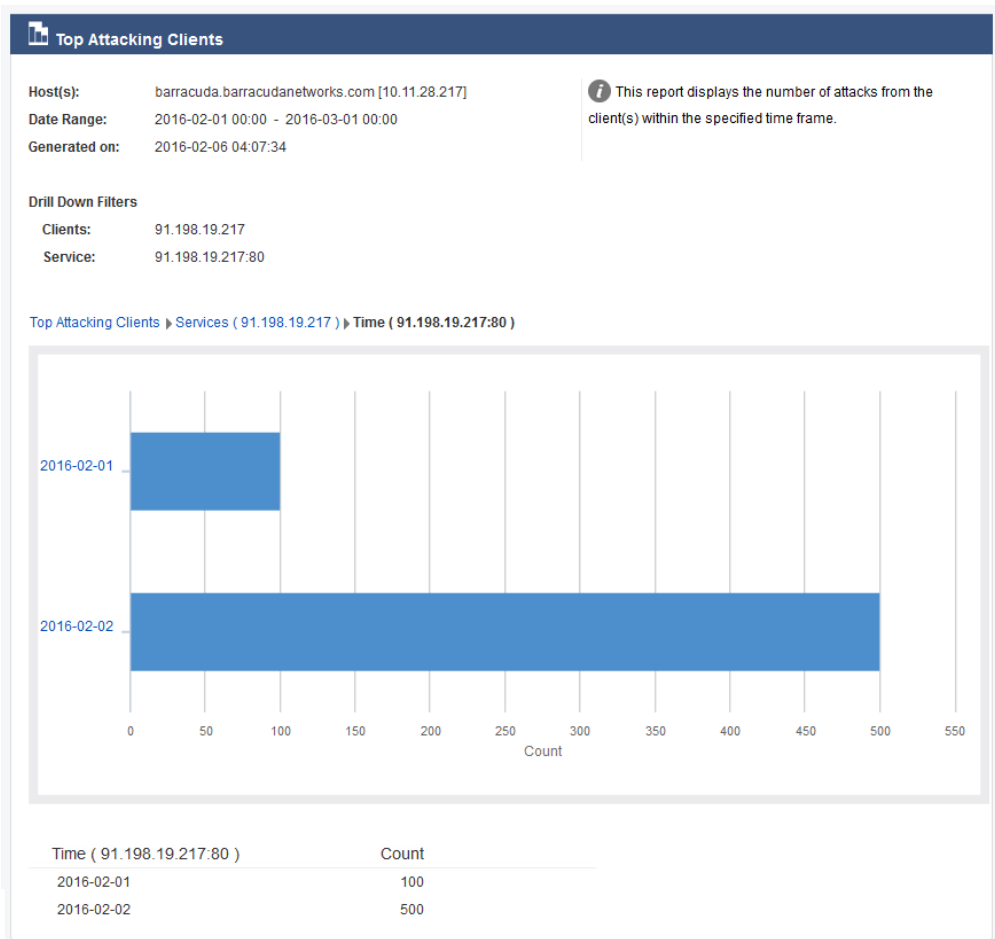

|                              |  |           |  |  |
|------------------------------|--|-----------|--|--|
| Top Attacking Region/Country | Displays the number of attacks from different countries within the specified time frame. | Bar Chart | <ul style="list-style-type: none"> <li>• <b>X</b> plots display the count of attacks corresponding to country code.</li> <li>• <b>Y</b> plots display the two (2) character country code.</li> </ul> | Report can be drilled down by: <ul style="list-style-type: none"> <li>• Time</li> <li>• Service</li> </ul> |
|------------------------------|--|-----------|--|--|
