

How to Disable Throttling in Microsoft Exchange Server 2010

<https://campus.barracuda.com/doc/48201952/>

This article refers to the Barracuda Cloud Archiving Service and Microsoft Exchange Server 2010.

- If you are using Microsoft Exchange Server 2013, refer to [How to Disable Throttling in Microsoft Exchange Server 2013 and Newer](#)
- If you are using Microsoft Exchange Server 2007, refer to [How to Disable Throttling in Microsoft exchange Server 2007](#)

Microsoft Exchange Server 2010 message throttling policies set bandwidth limits and restrict the number of processed messages. In order to disable throttling, you must create an appropriate policy and assign it to the service account as documented in the Microsoft TechNet article [Set Throttling Policy](#).

Following is a guideline; adjust as necessary for your environment.

Step 1. Create Service Account

If you have not already done so, create a new service account using the steps in the article [Creating an Email Service Account for Microsoft Exchange Server](#). Otherwise, proceed to *Step 2: Assign Permissions*.

Step 2. Assign Permissions

Use the following steps to assign the Microsoft Exchange Server service account to the Application Impersonation Management role:

1. Log in to the Exchange Server as the administrator.
2. From the **Start** menu, go to **Start > Programs > Microsoft Exchange Server 2010 > Exchange Management Shell**.
3. At the command prompt, type the following command replacing *serviceAccount* with the account created in **Step 1: Create Service Account**:

```
New-ManagementRoleAssignment -Name:exchangeImpersonation -  
Role:ApplicationImpersonation -User:serviceAccount
```

Step 3. Create and Assign Throttling Policy

Use the following steps to create and assign a new throttling policy, replacing *PolicyName* with the new policy name, and replacing *PolicyAdmin* with the Exchange Server 2010 service account created in **Step 1: Create Service Account**:

1. Log in to the Exchange Server as the administrator.
2. From the **Start** menu, go to **Start > Programs > Microsoft Exchange Server 2010 > Exchange Management Shell**.
3. At the command prompt, type the following command:
`New-ThrottlingPolicy PolicyName`
4. Press **Enter**. At the command prompt, type the following command:
`Set-ThrottlingPolicy PolicyName -RCAMaxConcurrency $null -
RCAPercentTimeInAD $null -RCAPercentTimeInCAS $null -
RCAPercentTimeInMailboxRPC $null -EWSMaxConcurrency $null -
EWSPercentTimeInAD $null -EWSPercentTimeInCAS $null -
EWSPercentTimeInMailboxRPC $null -EWSMaxSubscriptions $null -
EWSFastSearchTimeoutInSeconds $null -EWSFindCountLimit $null`
5. Press **Enter**. At the command prompt, type the following command:
`Set-Mailbox "PolicyAdmin" -ThrottlingPolicy PolicyName`
6. Press **Enter**.
