

How to Configure a SharePoint Web App

The Barracuda NextGen Firewall F-Series SSL VPN offers preconfigured templates for Microsoft SharePoint 2010 and 2013. The template automatically fills in all necessary web app parameters and configures Single Sign-On using the session username and password. If the user must use a different password or user to sign in, create user attributes to replace the session attributes.

Configure a SharePoint web app

1. Go to **CONFIGURATION > Configuration Tree > Box > Virtual Servers > your virtual server > Assigned Services > VPN-Service > SSL-VPN.**
2. In the left menu, select **Web Apps.**
3. Click **Lock.**
4. In the **Proxied Web Apps** section, click **+** to add a web app to the list.
5. Enter a **Name** for the web app and click **OK.** The **Proxied Web Apps** window opens.
6. Select the **SharePoint** template matching your SharePoint server from the **Web Apps Template** dropdown. The **Enter Name** window opens.

7. Enter the non-qualified hostname of your Microsoft SharePoint server and click **OK.** E.g., yoursharepoint

Do not enter a FQDN for the SharePoint server.

8. Enter the Single Sign-On (SSO) domain for your SharePoint server and click **OK.**

9. Enter the **Visible Name.** This is the name used in the desktop and mobile portal for this web app.
10. (optional) Check **Must be Healthy** if the user has to pass a health check before launching the web app. This setting requires a configured NAC client on a Windows device and policy server. For more information, see [Access Control Service](#).
11. (optional) To restrict access to the web app by user group, replace the * entry in the **Allowed User Groups** list. Click **+** to add new user group.
12. (optional) Click **Ex/Import** to upload a custom icon.
13. (optional) To use user attributes to sign in, replace the session attributes in the **HTTP Authorization Headers** section with user attributes. For more information on how to create user attributes, see [How to](#)

[Use and Create Attributes.](#)

14. Click **OK**.
15. Click **Send Changes** and **Activate**.
