

Multiple x86-Based File Servers with Dedicated Archive Server

<https://campus.barracuda.com/doc/49053826/>

This section refers to the Barracuda ArchiveOne for Files version 7.2.0 and higher.

Use this installation if you have multiple x86-based file servers and wish to install the Agent on a separate Archive Server:

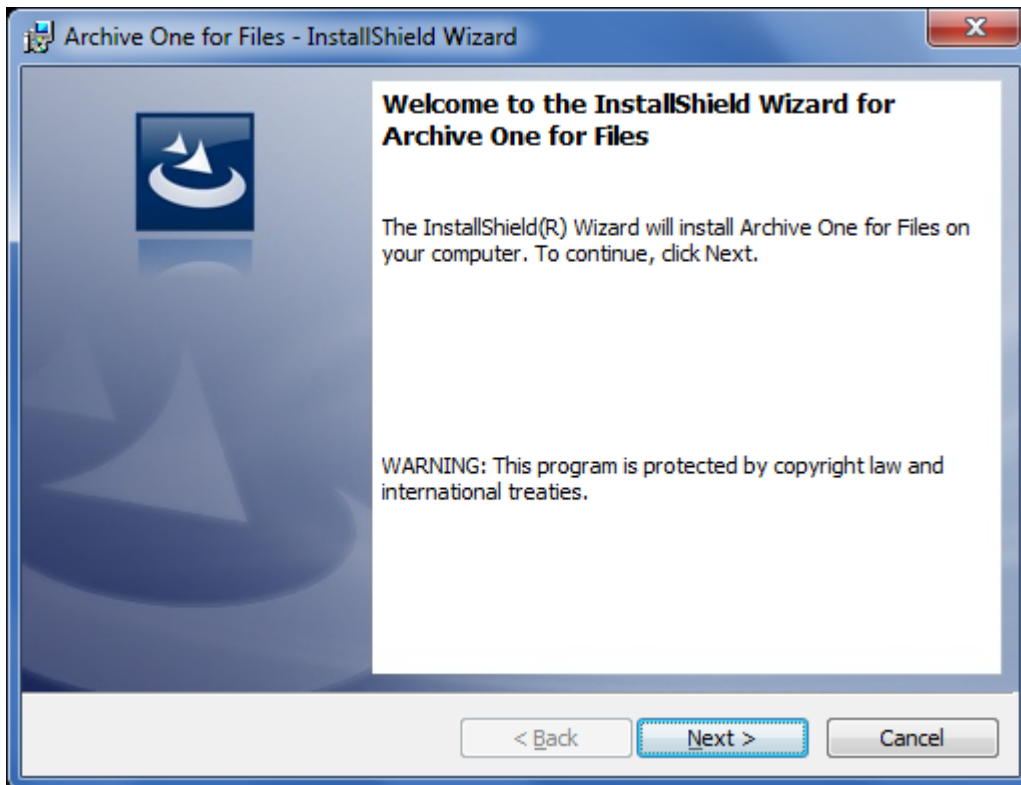

For other installation options, see [ArchiveOne for Files Installation Options](#).

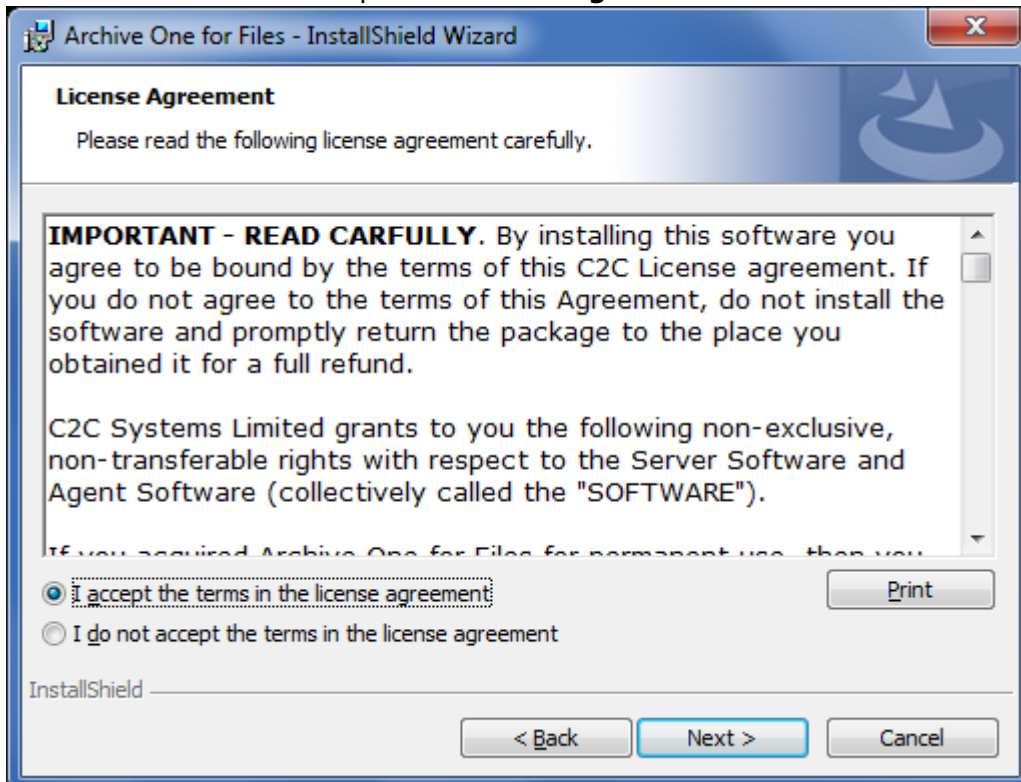

Step 1. Install Main Application

Complete the following steps on *each* file server in your environment.

1. Log in to the Archive Server as the administrator, and run **ArchiveOneForFiles.exe**; the installation wizard displays:

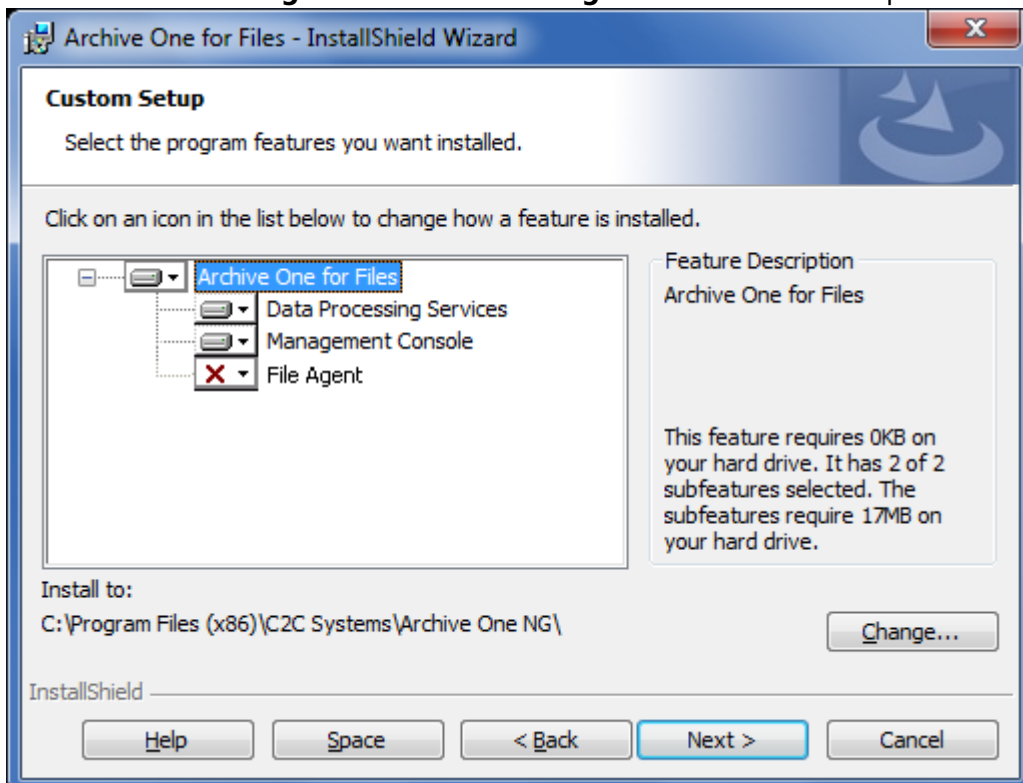

2. Click **Next**. Read and accept the **License Agreement**:

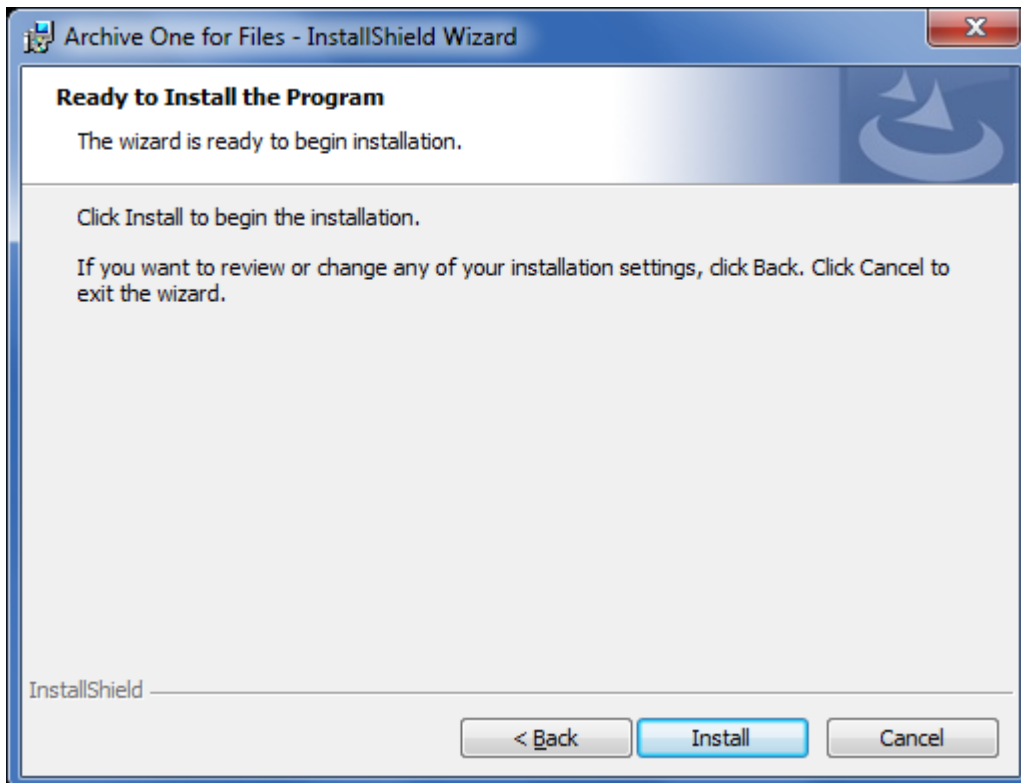

3. Click **Next**. In the **Customer Information** page, enter the **User Name** and **Organization** name:

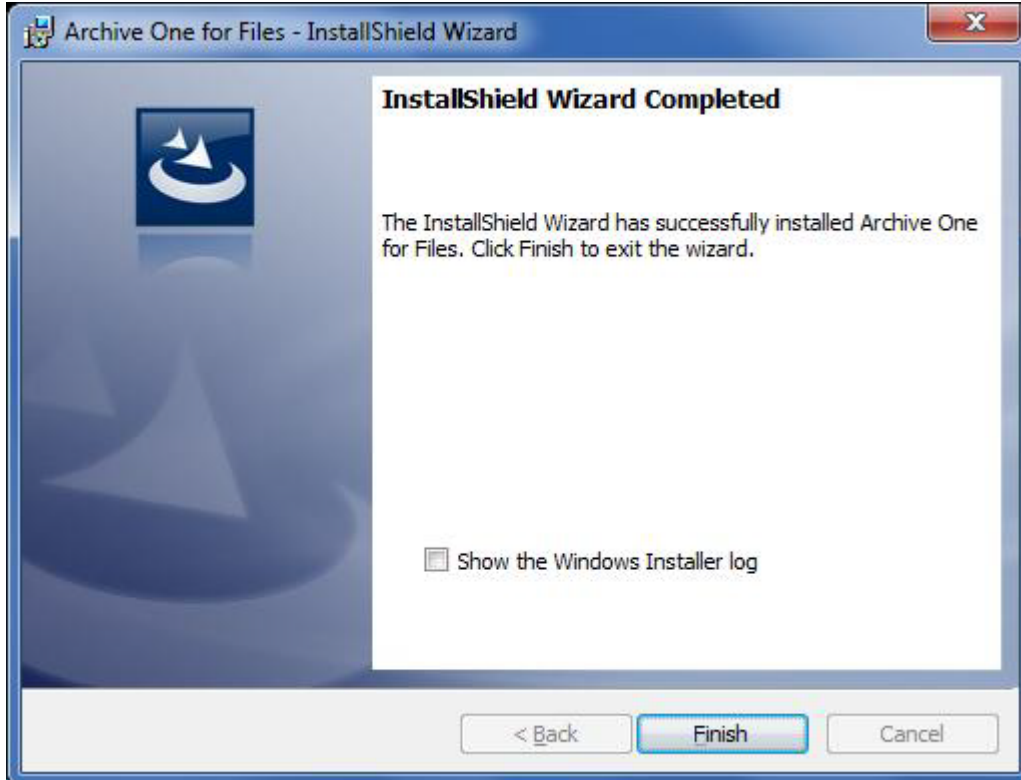

4. Click **Next**. The **Custom Setup** page displays. Clear the **File Agent** component so that only the **Data Processing Services** and **Management Console** components are selected:

5. Click **Next**. The **Ready to Install the Program** page displays:

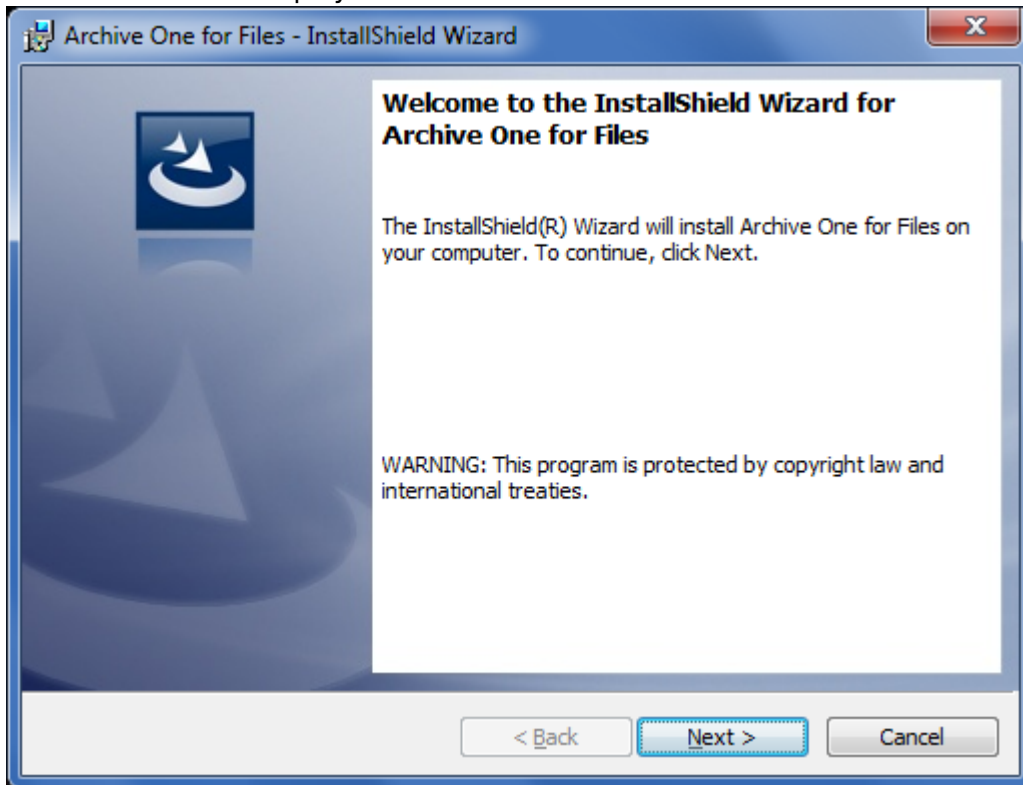

6. Click **Install** to begin the installation. Once the installation is complete, click **Finish**:

Step 2. Install Agent on x86-Based File Server

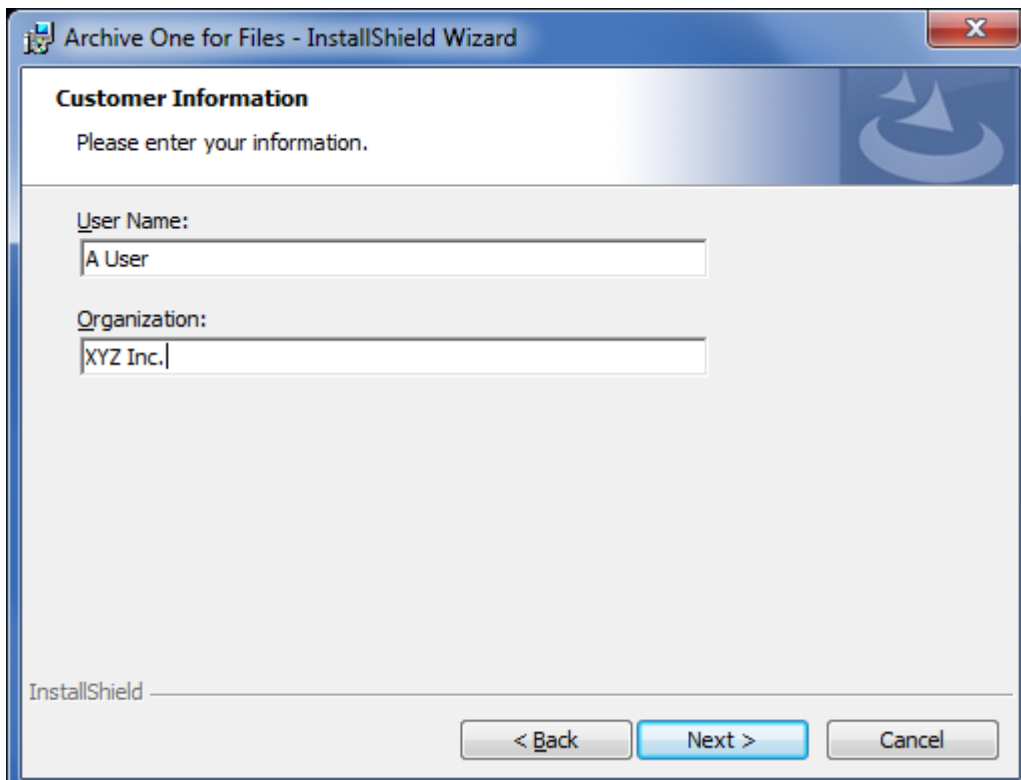

1. Log in to the x86-based file server as the administrator, and run **ArchiveOneForFiles.exe**; the installation wizard displays:

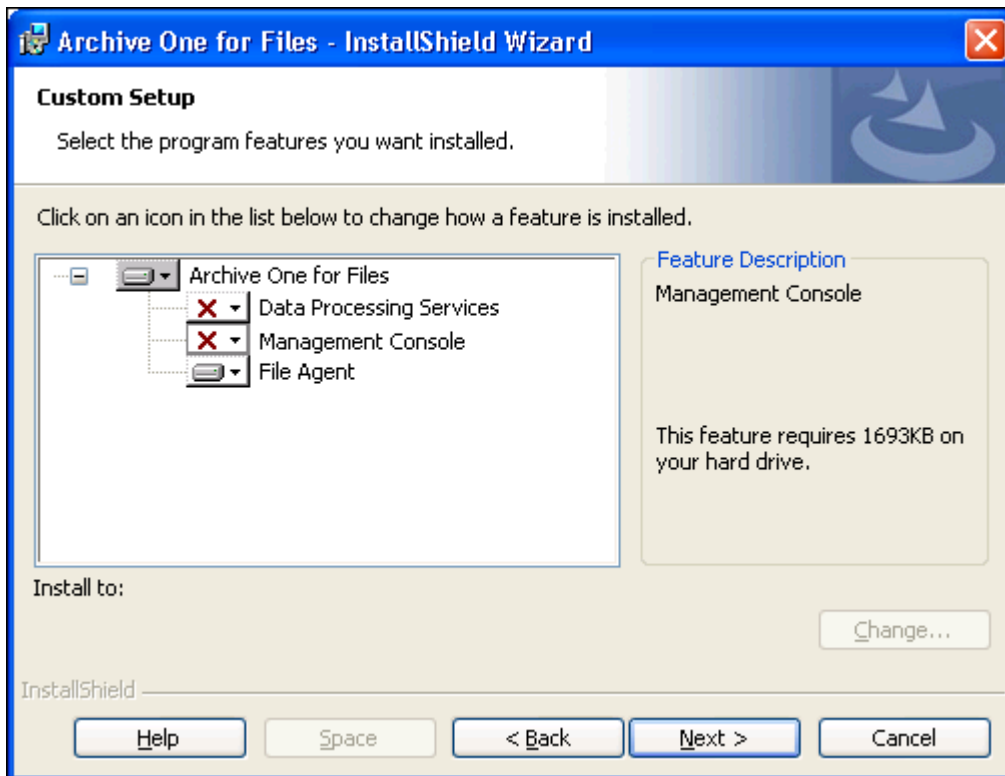

2. Click **Next**. Read and accept the **License Agreement**:

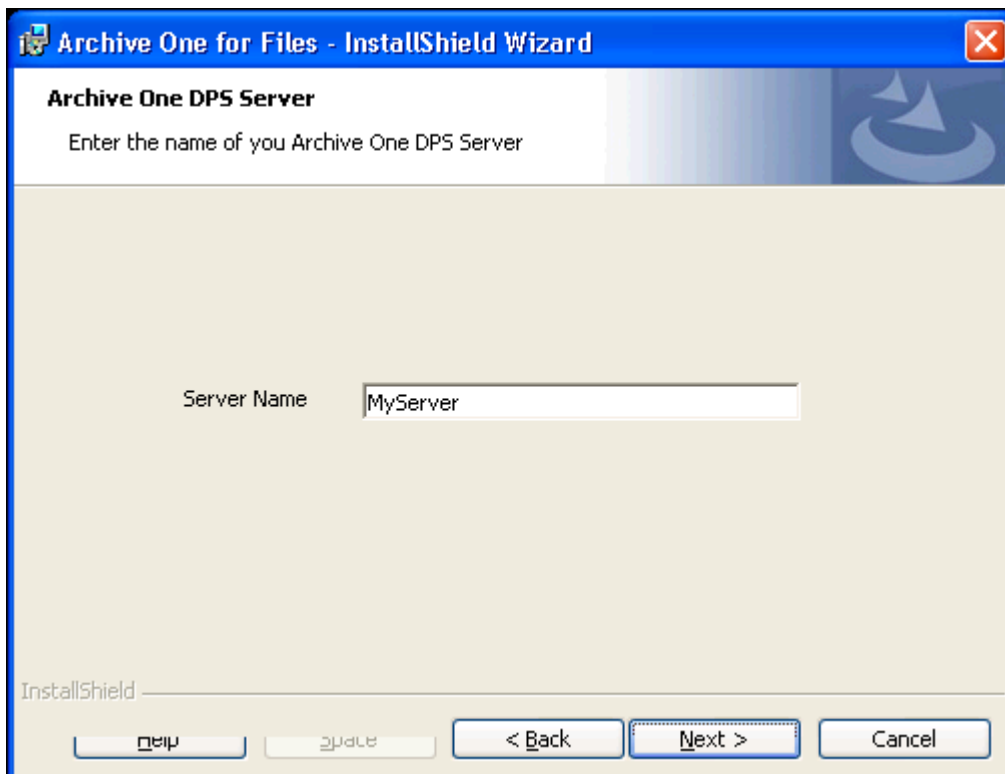

3. Click **Next**. In the **Customer Information** page, enter the **User Name** and **Organization** name:

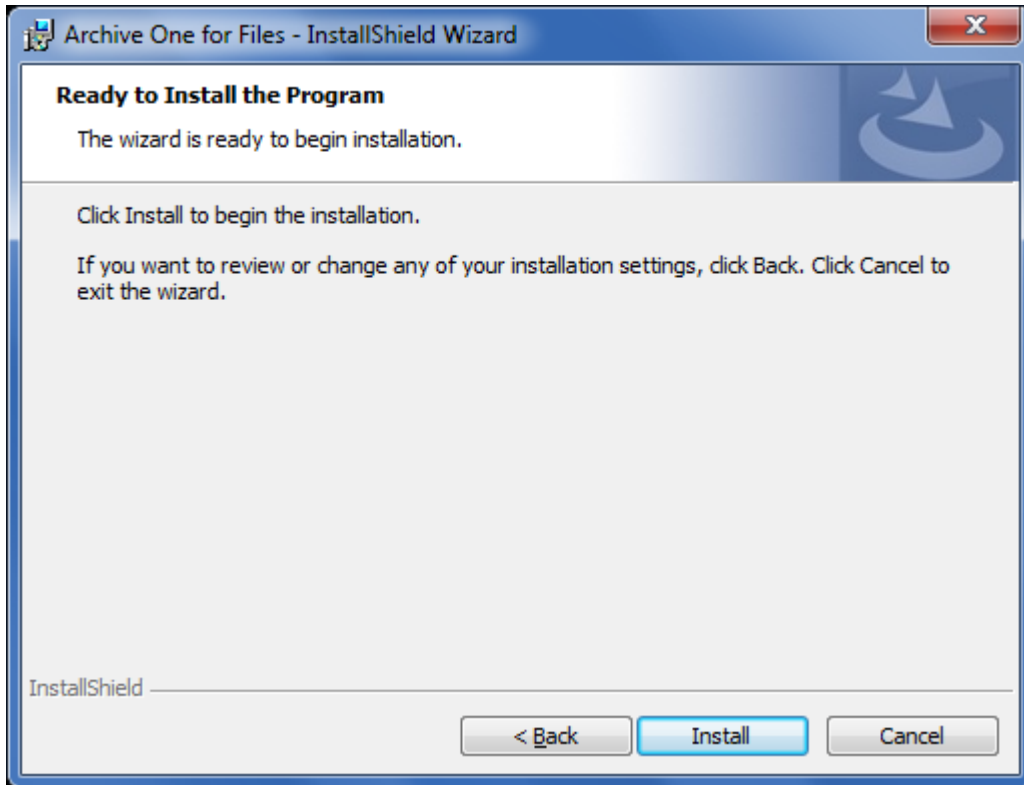

4. Click **Next**. The **Custom Setup** page displays. Clear the **Data Processing Services** and **Management Console** components, and select **Files Agent**:

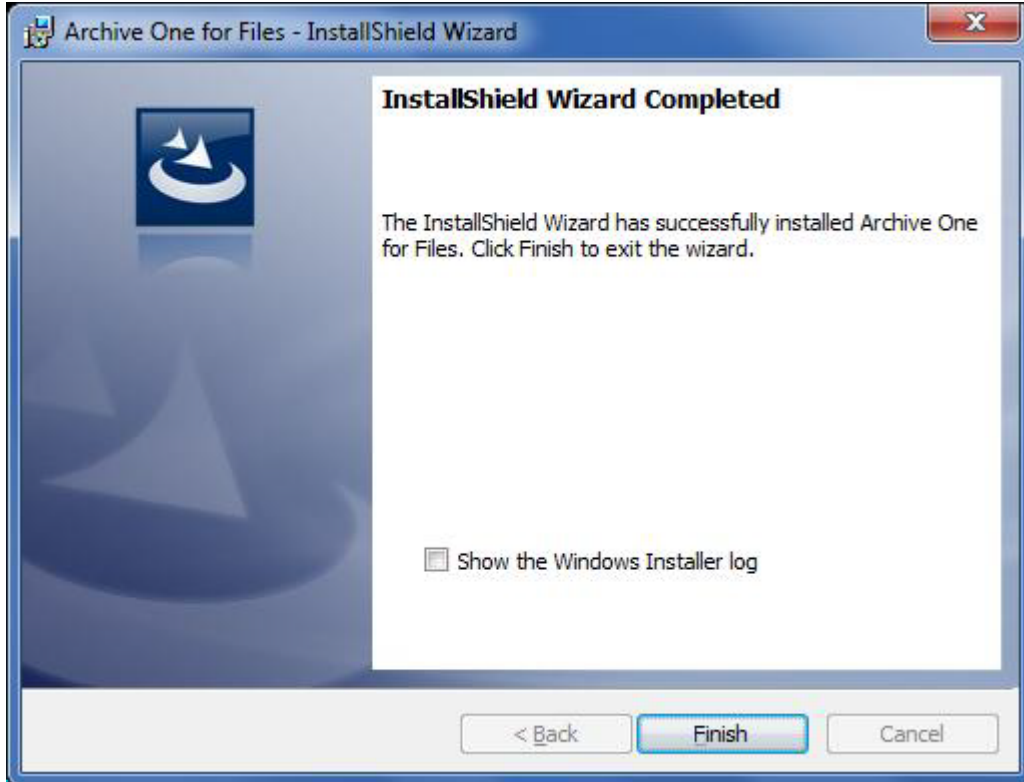

5. Click **Next**. In the **ArchiveOne DPS Server** page, enter the name of your Archive Server in the **Server Name** field:

6. Click **Next**. The **Installation** page displays:

7. Click **install**. Once the installation is complete, click **Finish**:

Continue with [Step 2 - Configure ArchiveOne for Files Licensing](#).
