

SSL VPN User Interfaces

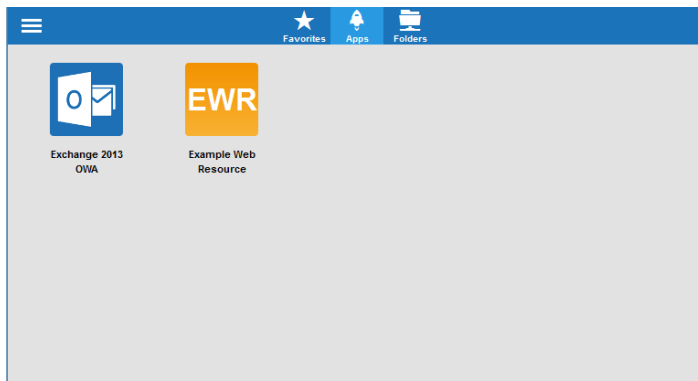

<https://campus.barracuda.com/doc/50659977/>

The SSL VPN service can be accessed through the responsive web portal or through CudaLaunch. The web portal is designed to automatically display a version customized for the device type you are using. It automatically adjusts to mobile and desktop devices in portrait and landscape mode. The following SSL VPN features are available, depending on the interface:

SSL VPN feature	CudaLaunch	Web Portal	Link
Proxied Web Forwards	Yes	Yes	How to Configure a Generic Web Forward
Tunneled Web Forwards	Yes	No	How to Configure a Tunneled Web Forward
Applications (e.g. RDP)	Yes	No	How to Configure SSL VPN Applications for RDP
SSL Tunnels	Yes	No	How to Configure SSL Tunnels
Network Places	No	Yes	How to Configure Network Places
User Attributes	Yes	Yes	How to Use and Create Attributes
VPN Group Policies	Yes	Yes	How to Configure VPN Templates in the SSL VPN
SSL VPN NAC	No	Yes	How to Configure NAC for SSL VPN

SSL VPN web portal

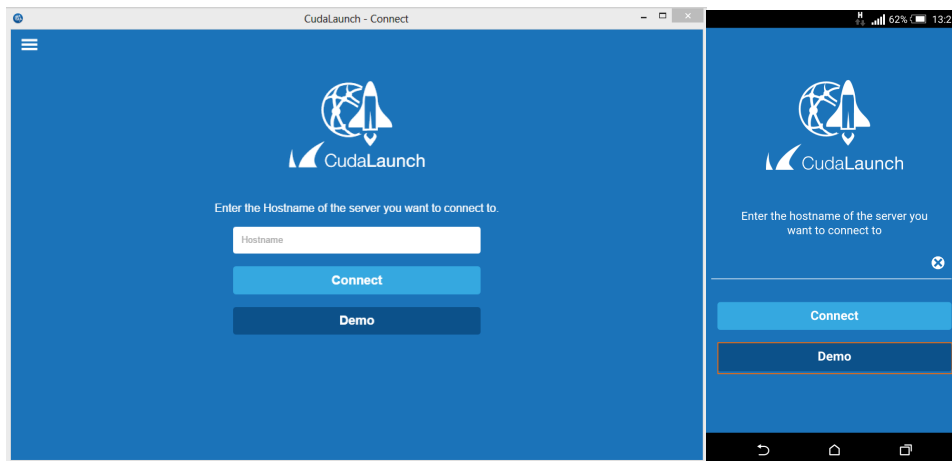

The SSL VPN service includes web portals for both mobile and desktop devices. The responsive web interface automatically adapts its layout to the screen resolution and screen orientation. SSL VPN features requiring an SSL tunnel are not available via the web interface.

For more information, see [SSL VPN Web Portal User Guide](#) and [SSL VPN Supported Devices](#).

CudaLaunch

CudaLaunch offers secure remote access to your organization's applications and data through a mobile or desktop app. The desktop app is available for Windows and macOS. The mobile app can be downloaded from the Apple App Store and Google Play Store for iOS and Android. CudaLaunch is required if you want to use either tunneled web forwards, applications, or SSL tunnels.

For more information, see [CudaLaunch](#).
