

How to Manually Install the Licenses for the Control Center

<https://campus.barracuda.com/doc/53248475/>

You must license the Control Center before adding managed firewalls. The licenses for the Control Center are associated with the hardware ID of the system. The MAC address of a network card, the main board ID, or the CPU ID are used as the key for the licenses. The base license must be installed on the box layer and in the Control Center management interface.

Before You Begin

Make sure the Control Center license is installed and activated on the box layer. For more information, see [Licensing](#).

Step 1. Export the Base License on Box Layer

1. Log into the box layer of the Control Center.
2. Open the **CONFIGURATION > Full Config > Box > Box Licenses** page.
3. In the **Licenses** table, select the **Base License** and click **Im/ Export** and select **Export to Clipboard**.

Step 2. Import the Base License

1. Log into the Control Center.
2. Open the **CC Identity** page (**Config > Global Settings > CC Identity**).
3. Click **Lock**.
4. In the **CC Identification** section, click **Import** and select **Import from Clipboard**.
5. In the **Organization** field, enter your organization name.
6. Click **Send Changes** and **Activate**.
