

How to Download Applications, Updates, and Hotfixes

<https://campus.barracuda.com/doc/53248693/>

To download updates, hotfixes, or applications for your Barracuda NextGen Firewall F-Series or NextGen Control Center, use the **Updates** element on the **DASHBOARD** page for standalone units, or download the update packages directly from the [Barracuda Download Portal](#).

Download from the DASHBOARD Updates Element

The **Updates** dashboard element shows all available and installed updates, hotfixes, and applications for your NextGen Firewall F-Series. Click on the download icon to download the update. Use the **FILTER** option to quickly find the desired update or hotfix. Click on the file to open the description.

- **Available** – All available updates and hotfixes for this unit as well as update notifications for NextGen Admin, NextGen Report Creator, and Barracuda Network Access Client.
- **Installed** – Previously installed updates and hotfixes.

The screenshot shows the 'UPDATES' dashboard with a 'FILTER' button and a gear icon. The dashboard is divided into 'Available' and 'Installed' sections. A table lists updates with columns for Scope, Type, Release Date, Name, and a download icon. The 'SMTP Gateway Hotfix 668' update is highlighted, and its details are shown in a pop-up window below.

Scope	Type	Release Date	Name	
Feature	App	02.04.2015	NG Admin Application for Release 6.1.0	Download
Maintenance	Package	23.03.2015	URL Filter Hotfix 674	Download
Critical	Package	23.03.2015	Application Control Hotfix 654 v5.4.5	Download
Maintenance	Package	23.03.2015	SMTP Gateway Hotfix 668	Download
Critical	Package	23.03.2015	Session Sync Hotfix 666	Download
	Package	23.03.2015	Proxy Hotfix 660	Download
Security	Package	23.03.2015	Glibc Hotfix 664	Download

SMTP Gateway Hotfix 668

Name: SMTP Gateway Hotfix 668
 File name: SMTP-gateway-668-5.4.5-80463.tgz
 Version: 668-5.4.5-80463
 File size: 2.52 MB (MD5 hash: b855bfe58e76c6f2b8b3939788df3f44)

Fixes an issue for mail delivery (IPv4)

This patch fixes an issue for mail delivery (IPv4) for a destination with an IPv6 DNS MX record only

Affects the following components:
 mailgw]

Download Barracuda NextGen Admin

Make sure that you are not using a Barracuda NextGen Admin version that is older than the NextGen Firewall F-Series or Control Center firmware. Since NextGen Admin is backward compatible, it is recommended to use the latest version.

Download Barracuda NextGen Admin using your Barracuda Networks account:

1. [Log into the Barracuda Download Portal](#).
2. Select **NG Admin** from the **Type** list.
3. Click **Search**.
4. From the product list, select the applicable **Barracuda NextGen Admin** version.
5. After the download entry expands, click the **Download** button.

Download Barracuda F-Series Install

Barracuda F-Series Install creates the installation USB sticks used to reinstall NextGen Firewall F-Series hardware appliances.

1. [Log into the Barracuda Download Portal](#).
2. Select **Utility** from the **Type** list.
3. Click **Search**.
4. Select **Barracuda NextGen Firewall F-Series** from the list of products.
5. From the product list, select the applicable **Barracuda F-Series Install** version.
6. After the download entry expands, click the **Download** button.

Download Updates and Hotfixes

From your Barracuda Networks Account, you can download updates and hotfixes for the Barracuda NextGen Firewall F-Series:

- **Updates** – Used for upgrades to newer releases.
- **Patches** – Patches for minor releases are available for up to firmware 5.4. For example, 5.4.5 to 5.4.6. Starting with 6.0, only update packages are available.
- **Hotfixes** – Hotfixes include critical bug fixes, such as security vulnerabilities.

1. [Log into the Barracuda Download Portal](#).
2. If you want to download an update:
 1. Select **Update** from the **Type** list.

2. Click **Search**.
 3. Select the update that you want to download.
 4. After the download entry expands, click the **Download** button.
3. If you want to download a hotfix or patch:
 1. Select **Hotfix** from the **Type** list.
 2. Click **Search**.
 3. Select the hotfix or patch that you want to download.
 4. After the download entry expands, click the **Download** button.
