
Appliance/Instance Management

<https://campus.barracuda.com/doc/54853834/>

The Appliance/Instance Management is the Proxy/Device view in the Barracuda WAF Control Center (WCC). In the proxy view, you can view the configuration of the selected device, and modify the settings (if required). The configuration changes made will be applied immediately, and the requests and responses are treated based on the configured settings. For more information on configuring the Barracuda Web Application Firewall, refer to the [Barracuda Web Application Firewall](#) documentation.
