

NTLM Authentication Management

<https://campus.barracuda.com/doc/6553616/>

Select **NTLM** as the authentication mechanism. The NTLM Authentication Management screen appears, and displays a list of NTLM authentication mechanisms.

Do one of the following:

- To edit an NTLM mechanism, click the **NTLM Domain** name.
- To add an NTLM mechanism, click **Add NTLM Authentication Mechanism**.

The Add/Update NTLM Authentication Mechanisms screen appears.

Enter or edit the following fields:

- **Domain Name** - The NetBIOS or pre-Windows 2000 name of your Windows domain.
- **Server IP** - The IP address of your NTLM server. In a Windows environment, this is typically the domain controller.
- **Server Hostname** - Hostname of your NTLM domain controller.
- **Username** - Username for joining the Windows domain. **Note:** This user must have Administrator privileges.
- **Password** - Password for the user in the Username field, above.

Be sure to **Submit** then **Save Changes**. When prompted to sync the Barracuda Web Security Service Connector, click **Sync**.
