

Command Line Examples For Installation of the Barracuda WSA With MSI Installer

<https://campus.barracuda.com/doc/68354610/>

This article applies to installing the Barracuda WSA using the Barracuda Web Security Gateway. Note that the Barracuda WSA uses the **External IP Address/Hostname** specified on the **ADVANCED > Remote Filtering** tab as the **SERVICE_URL** in the installation command.

Follow command line examples below to install the Barracuda WSA from the command line of a Windows PC or laptop, or for use in a .mst file or GPO. See [Configuration Options for the Barracuda Web Security Agent](#) for Barracuda WSA installation options.

File type	Example command (type all on one line)	Comments
.msi, used with GPO	<code>msiexec.exe /i BarracudaWSASetup.msi /qn SERVICE_MODE=1 SERVICE_URL=10.1.0.51 DEBUG=1 SERVICE_PORT=8280 WD=1 USER_MODE=1 PASSWORD="1234"</code>	/qn: Doesn't show web interface installation boxes. USER_MODE=1: Doesn't show the icon in system tray (silent operation). DEBUG=1 denotes logging network errors only. (version 5.0 and above)
.msi, stored in an .mst file	<code>msiexec.exe /i BarracudaWSASetup.msi TRANSFORMS="myWSAConfig.mst" /qb</code>	/qb: Shows the basic web interface installation boxes. Put the .mst file in your setup program directory.
