

Usage Based/Metered Auto Scaling

<https://campus.barracuda.com/doc/68361418/>

The **Usage Based/Metered** Barracuda CloudGen WAF instance's auto scaling works the same as Pay-As-You-Go/Hourly auto scaling. For more information refer to the [Pay-As-You-Go/Hourly Auto Scaling](#) article.

To successfully launch and use the metered AMI, the account being used to launch the instance must have the ability to use the “**AWSMarketplaceMeteringFullAccess**” IAM role with “**Allow All**” permissions. If these permissions are not available, the instance will not be launched successfully.

The **Usage Based** auto scaling CFT is available on [GitHub](#).
