

Video - Scan Your Web Application and Remediate Vulnerabilities

<https://campus.barracuda.com/doc/68362215/>

This video describes how to scan your web application and remediate vulnerabilities that are found in the scan.

Name	URL	Schedule	Details	Actions
public.bloppazort.com	http://public.bloppazort.com/	Manual	Max depth 3, No Authentication	New Scan Clone Edit Delete Run Now

The screenshot shows the Barracuda Vulnerability Remediation Service (VRS) web application interface. The browser address bar shows the URL `vrs.barracudanetworks.com/#/webapp`. The page title is "Vulnerability Remediation Service". The account is "Friendly Enterprises (default)" and the user is "t@barracuda.com".

The main navigation bar includes "Dashboard", "Scanner", "Vulnerabilities", and "Reports". The "Scanner" tab is active, and the "Web Applications" sub-tab is selected. A "Scan Status" link is also visible.

The "Web Applications" section has a search bar labeled "Search by Name or URL" and an "Add Web Application" button. Below this is a table listing web applications:

Name	URL	Schedule	Details	Actions
public.bloppazort.com	http://public.bloppazort.com/	Manual	Max depth 3, No Authentication	View Scan, Clone, Edit, Delete
Default		Manual		Run Now, Clone, Edit, Delete
