
Overview

<https://campus.barracuda.com/doc/69960173/>

Barracuda Cloud Control is a comprehensive cloud-based single pane of glass web interface that enables administrators to monitor and configure Barracuda services. Additionally, through Barracuda Appliance Control, the administrator can connect Barracuda hardware devices, allowing you to manage all your Barracuda products from a single console.

With Barracuda Appliance Control, you can check the health of all connected devices, run reports that are generated by gathering data from all the devices, push config changes based on user roles with varied permissions.

- **Barracuda Cloud Control Deployment** – Cloud-based service available through your Barracuda Networks customer account; no need to install software or deploy hardware.
- **Barracuda Appliance Control Deployment** – Barracuda Appliance Control through Barracuda Cloud Control. Check the health of connected devices, run reports generated by gathering data from connected devices, and push configuration changes to your Barracuda Networks products.

Where to Start

Mobile Applications
