

## Create a Barracuda Cloud Control Account

<https://campus.barracuda.com/doc/69960174/>

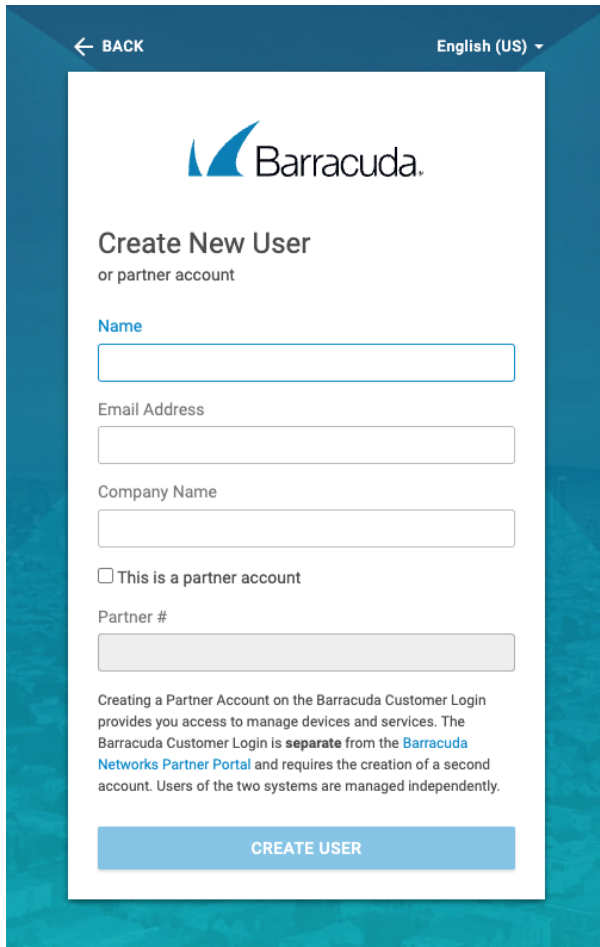

Before you can connect your Barracuda Networks products to Barracuda Cloud Control, you must first create an account:

1. If you do not have a Barracuda Cloud Control account, go to <https://login.barracudanetworks.com/> and click **Create a User**.

The image shows a screenshot of the Barracuda login page. At the top right, there is a language selector set to "English (US)". The main content area features the Barracuda logo, the heading "Sign In", and the subtext "with your Barracuda Account". Below this is a text input field labeled "Email Address". Under the input field is a blue button labeled "NEXT". Below the button is a link that says "CREATE A USER". At the bottom, there is a disclaimer: "By clicking 'Next', you agree to our Privacy Policy" and a link for support: "Need Help? Contact Barracuda Networks Support".

2. Enter your **Name**, **Email Address**, and **Company Name**, and specify whether **This is a partner account**. Click **Create User**.

For partners, be sure to review the [Partner Accounts](#) section on [How to Create a Partner Account](#).

Company Name

☐ This is a partner account

Partner #

Creating a Partner Account on the Barracuda Customer Login provides you access to manage devices and services. The Barracuda Customer Login is **separate** from the [Barracuda Networks Partner Portal](#) and requires the creation of a second account. Users of the two systems are managed independently.

CREATE USER

3. Follow the instructions emailed to the entered email account to log in and create your Barracuda Cloud Control account.
4. After submitting your new account information, the **Account** page displays your account name, associated privileges, and username.

For your security, Barracuda Cloud Control has strict password rules. Please familiarize yourself with these [Password Complexity Policies](#).

Continue reading with the next Getting Started topic: [How to Change the Preferred Language](#).
