

How to Switch Between LDAP Environments

<https://campus.barracuda.com/doc/69960216/>

LDAP groups display on the **Home > Admin > Groups** page after you have enabled [LDAP Active Directory and Azure AD](#) on the **Home > Admin > Options** page, and synchronization is complete. If your account is connected to two or more LDAP environments, the **Home > Admin > Groups** page displays the **Switch Environments** option which allows you to access other environments. This might occur if you have a Partner account with multiple customers with LDAP authentication enabled. The currently selected LDAP environment name displays to the right of **Switch Environments**:

The screenshot shows the 'LDAP Groups' page in the Barracuda Cloud Control interface. The top navigation bar includes 'Admin', 'My Profile', and 'Partner'. Below this, there are tabs for 'Users', 'Groups', 'Services', 'Options', 'Audit Log', and 'Essentials'. The 'Groups' tab is selected. The page title is 'LDAP Groups'. On the right, there is a 'Sync groups now' button and a status message: 'Last synced 2016-12-19 08:51:59 EST • Syncs automatically every 3 hours'. A red box highlights the 'Switch Environments' button. To its right, the 'Current LDAP Environment' is shown with a cloud icon. Below this, there is a 'Show 10 groups' dropdown and a search bar. The main content is a table with columns: Name, Privileges, Entitlements, and Actions. The table lists four groups: Account Admins, Group A, Group B, and Group C. Each group has a blue arrow icon in the 'Name' column, a cloud icon in the 'Entitlements' column, and 'Edit' and 'View members' links in the 'Actions' column.

Name	Privileges	Entitlements	Actions
Account Admins	---	---	Edit View members
Group A	---	Expand for details.	Edit View members
Group B	---	Expand for details.	Edit View members
Group C	---	Expand for details.	Edit View members

1. Click **Switch Environments** to open the **Switch LDAP Environments** dialog box.
2. Select the environment you want to view, and then click **Switch**. The selected LDAP environment displays the associated LDAP groups in the **Home > Admin > Groups** page. Note that when you select a different LDAP environment, the environment ID displays at the end of the Barracuda Cloud Control URL.
