
CloudGen Firewall Product Information

<https://campus.barracuda.com/doc/71860836/>

Barracuda Networks offers a wide range of documentation materials intended to help customers get the most out of our products. The information you will find below spans all currently supported firmware versions of the CloudGen Firewall Family.

Refer to Hardware Models to get an idea of which hardware firewall suits your needs best. The Release and Migration Notes support administrators when the time comes to upgrade the firmware of a firewall. The End of Support (EoS) and End of Life (EoL) policies provide product life cycle information that will help you when upgrading your hardware and firmware. Note that Barracuda Networks no longer maintains documentation for EoS/EoL firmware versions; however, they are made available in the documentation archive.

Release and Migration Notes

Release Notes contain a list of new features, improvements, and known issues for each CloudGen Firewall firmware version. Migration Notes list the migration path, supported models, and, if applicable, manual migration steps to be carried out during the update.

For more information on migrating to newer firmware versions, see [Release and Migration Notes](#).

CloudGen Firewall F-Series Hardware Models

The CloudGen Firewall F-Series is available in multiple hardware models that meet different networking requirements, ranging from small or home offices to large data centers.

For more information on the latest Barracuda hardware models, see [Hardware Models](#) and [Legacy Hardware Models](#).

End of Support and End of Life Policies

End of Support (EoS) and End of Life (EoL) policies outline the product support guidelines for each product's life cycle.

For more information on End of Support (EoS) and End of Life (EoL) policies, see [End of Support and](#)
