

Enroll your Mobile Device to use Time-Based One-Time Passwords (TOTP)

<https://campus.barracuda.com/doc/72515791/>

To enroll your device, install both CudaLaunch and TOTP-compatible (Time-Based One-Time Passwords) apps on your mobile device. You can link your device and the TOTP app by completing the 2-step enrollment process:

1. Log into CudaLaunch or the SSL VPN web portal to scan the offered QR code.
2. Enter the verification code to finish enrolling your device.

Enroll a Mobile Device

1. Log into the SSL VPN or CudaLaunch without using TOTP.
2. Click the hamburger menu and click **Settings**.

3. Click **Google Authenticator**.

4. Enroll your device by scanning the QR code with your mobile device.
5. Enter the **Verification Code**.

Your TOTP app is now linked with Google Authentication on the CloudGen Firewall. If configured by your firewall admin, you can now use the 6-digit TOPT codes for the SSL VPN web portal and CudaLaunch.
