

Wi-Fi

<https://campus.barracuda.com/doc/72515869/>

CloudGen Firewalls equipped with a Wi-Fi interface can provide up to three independent Wi-Fi networks that are compliant to the IEEE 802.11b/g/n standard and offer strong WPA and WPA2 encryption. Configuration and administration of the Wi-Fi network is fully integrated into the Barracuda Networks security concept.

For more information, see [How to Configure a Wi-Fi Network](#).

Wi-Fi Guest Access

You can configure the Wi-Fi network to be used as a guest network with either a confirmation page or a guest ticketing system.

For more information, see [How to Configure Guest Access with the Ticketing System](#).

RADIUS/EAP Configuration for Wi-Fi Authentication

For large networks, you can configure a RADIUS and EAP server to handle user authentication.

For more information, see [How to Configure RADIUS Authentication](#).
