

How to Update a High Availability Cluster

<https://campus.barracuda.com/doc/73695382/>

Update your Barracuda CloudGen Firewall HA cluster to the latest generally available firmware version or if available early release versions.

Applying a new firmware version may result in a temporary loss of service and the unit may reboot. For this reason, you should apply new firmware versions during non-business hours.

Update a High Availability Cluster

To update the firmware version of a CloudGen Firewall High Availability cluster:

On the Active/Primary Firewall

1. Go to **ADVANCED > Backups** and back up the current configuration.
2. Go to **ADVANCED > Firmware Update**.
3. Click **Download** for the **Latest General Release (GA)** you want to update to. The download function is available as soon as a new general release is provided.

AVAILABLE UPDATES					Help
Scope	Type	Release Date	Name	Action	
Available	App	2017-07-06T01:16:31-0700	Hoffix 830 - Azure	Download	
Available		2017-06-29T07:48:19-0700	Barracuda NextGen Admin 7.1.0 GA	Download	

INSTALLED UPDATES			Help
Scope	Installation Date	Name	

4. As soon as the firmware downloads are complete, go to **ADVANCED > High Availability** and click **Manual Failover**.
5. Apply the new firmware and verify that the update has successfully finished.

On the Standby/Secondary Firewall

1. Go to **ADVANCED > High Availability** and click **Manual Failover**.
2. Apply the new firmware and verify that the update has successfully finished.
