

Creating a Workspace Using the ARM Template

<https://campus.barracuda.com/doc/73696955/>

You can use the Barracuda Web Application Firewall OMS ARM template to create or modify an OMS workspace. The Barracuda Web Application Firewall enables you to create or configure the OMS workspace in the following locations:

- East US
- West Europe
- Southeast Asia
- West Central US
- Australia Southeast

The resources used by the Barracuda OMS solutions are available only in the above-mentioned regions, so the OMS workspace should be created in these regions. The OMS workspace can be associated with a resource group that is created in any region.

The Barracuda Azure Resource Manager (ARM) template installs and configures all dashboards provided by the Barracuda Web Application Firewall in the OMS workspace.

The Barracuda Web Application Firewall ARM template to create an OMS workspace is available on [GitHub](#).

Next Step
