

## Deploying the ARM Template

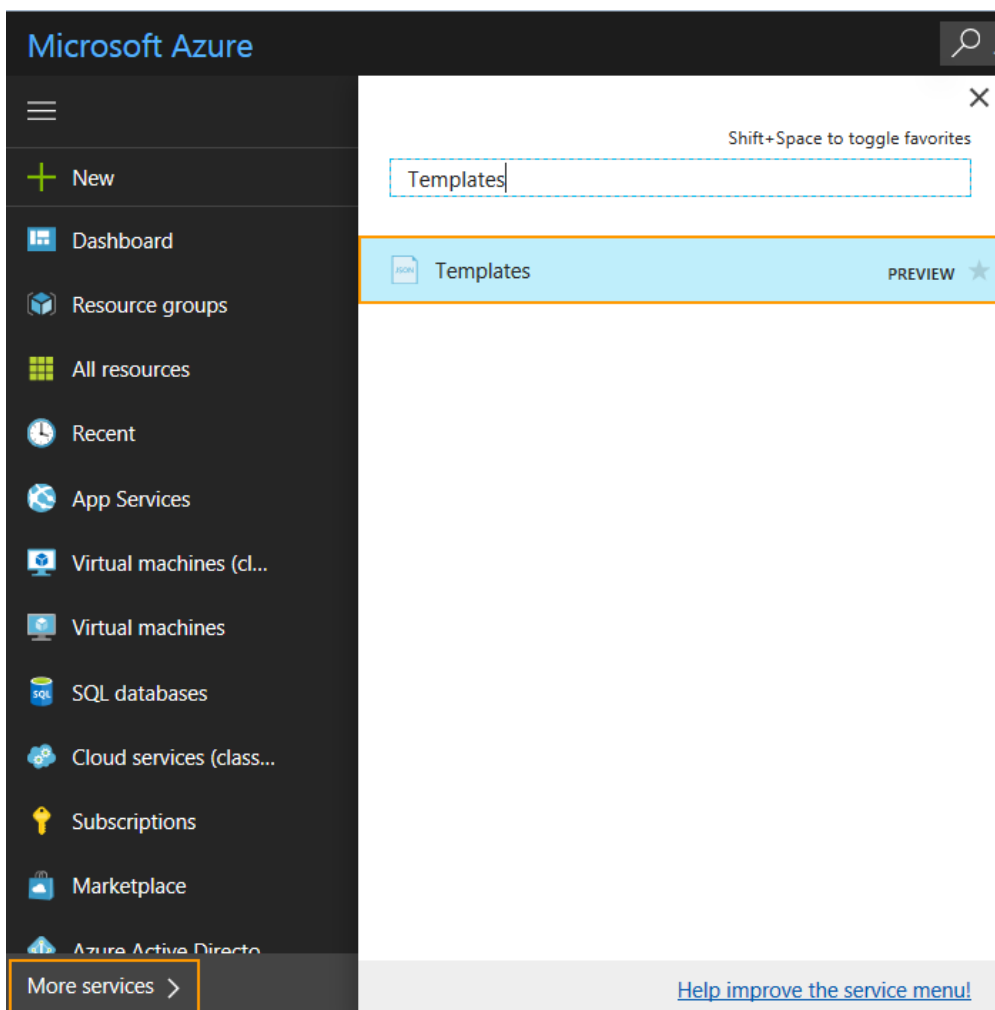

<https://campus.barracuda.com/doc/73696961/>

The Barracuda Web Application Firewall BYOL ARM template and OMS template are available on GitHub:

- [BYOL ARM Template](#)
- [OMS Template](#)

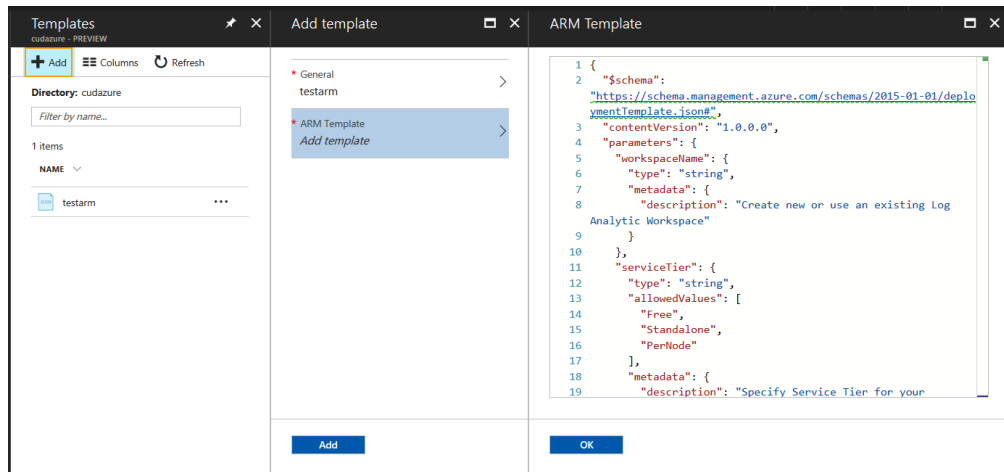

Perform the following steps to deploy the ARM template:

1. Log into the **Azure Portal**.
2. Click **More Services** at the bottom of the screen.
3. In the **Filter** field, type Templates and select **Templates**.

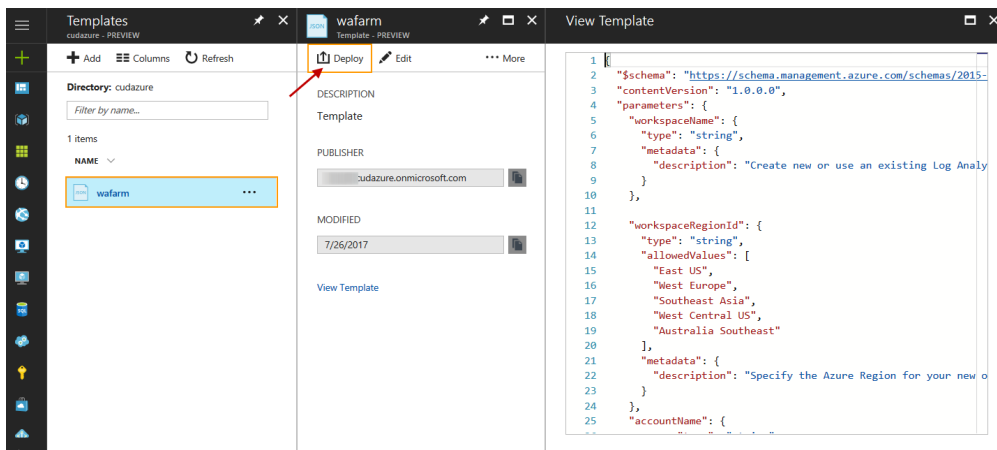

4. In the **Templates** page, click **Add**.
5. In the **Add template** page:
  1. Select **General** and specify values for the following settings:

1. **Name** - Enter a name for the template.
2. **Description** - Provide a description for the template.
2. Click **OK**.
3. Select **ARM Template** and do the following:
  1. Clear the **ARM Template** text area.
  2. Copy the *Barracuda ARM template* and paste it in the text area.
  3. Click **OK**.

6. Click **Add**.
7. In the **Templates** page, select the template you created in Step 5 and click **Deploy**.

8. In the **Custom deployment** page, do the following:
  1. **BASICS**
    1. **Subscription** - Select the subscription from the drop-down list.
    2. **Resource group** - Select an existing resource group, or create a new resource group to associate the OMS workspace.
    3. **Location** - Select the location under which you want to create the resource group. Note: This is available only when **Create new** is selected in the **Resource group** field.
  2. **SETTINGS**
    1. **Workspace Name** - Enter a name for the OMS workspace that needs to be created.

2. **Workspace Region** – Select the region in which you want to deploy the OMS workspace.
  3. **Pricing Tier** – Select a pricing tier as per your requirement from the drop-down list.
3. **TERMS AND CONDITIONS**
1. Select the Terms and Conditions check box.
9. Click **Purchase**.

Purchase

10. After the workspace is deployed successfully, type the workspace name created in Step 8 in the search box and select the workspace.

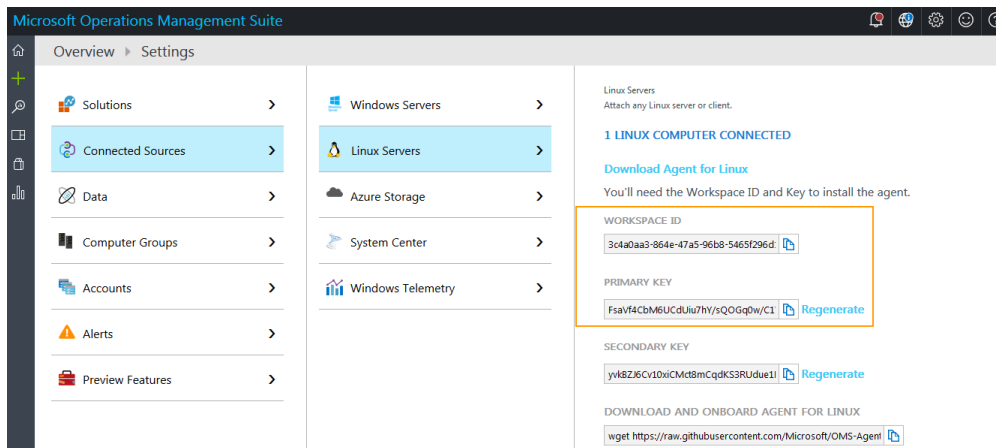

11. In the workspace page, click **OMS Portal** under **Management**. The Microsoft Operations Management Suite opens.

12. In the **Microsoft Operations Management Suite** page, select **Settings**.

13. In the **Settings** page:

1. Select **Connected Sources**.
2. Click **Linux Servers** and copy the **WORKSPACE ID** and **PRIMARY KEY** of the OMS server.

## Next Step

Continue with [Configure the Barracuda Web Application Firewall to Integrate with the OMS Server and Export Logs](#).
