

# **Restoring an Exchange Mailbox Level Backup**

https://campus.barracuda.com/doc/73698307/

### **Applicable Products**

These instructions apply to the following products:

• Barracuda Intronis Backup - MSP

### About Restoring an Exchange Mailbox Level Backup

You can restore individual messages, specific folders, or entire mailboxes from an Exchange Mailbox Level backup set. Depending on the purpose for the restore, you may want to restore the mail back into Exchange or restore it outside, in the form of individual message files or a (.pst) file.

### How to Restore and Exchange Mailbox Level Backup

- 1. From the **ECHOplatform** ribbon bar, select the **Manage** tab.
- 2. In the Manage screen, navigate to the client account and expand it.
- 3. Click on the computer ID hyper-link.
- 4. Select the **Restore** tab.
- 5. Click the **Restore** icon, next to Files and Folder.

At the restore page that opens, you will be on the Select tab. Drill down into the mailbox or folder you want to restore and place a check next to them. That which you have selected to restore will appear in the right-hand pane.

Click **Next** to proceed with the restore.

Select Destination Summary		
Where Do You Want To Restore? Select the destination of your restore, the method wit	h which you wish to restore and how existing data will be treated.	
Restore Method Determine how you would like the mailbox data to be restored and into which format.	Restore to file(s) Restore to .PST file Restore to Exchange	
Destination Choose where the data is restored	Path: C:\Exchange\Restored Browse	
Existing Files	Do not overwrite any existing files with restored files Overwrite existing files with restored files	
Deleted Items	Do not restore deleted items Restore deleted items	
< Previous		Next >

7. Choose whether you will restore to file(s) as (.msg) files, to a (.pst) file, or back into Exchange. If you choose either of the first two options, you will need to pick a destination for the restored file(s).

Modify existing files and deleted items behavior if you need to, then hit **Next** to see a summary of the restore or hit the **Restore** button near the bottom to start the restore.
