

Barracuda Firewall Admin

<https://campus.barracuda.com/doc/73702561/>

Barracuda Firewall Admin is a stand-alone, multi-administrator Microsoft Windows application used to administer CloudGen Firewalls, Secure Connectors, and Control Centers. Unlike web-based administration portals, Firewall Admin lets you manage multiple firewalls from a single interface that remains independent from web browser incompatibilities. Firewall Admin is backward-compatible to firmware version 5.2, allowing you to always use the latest Firewall Admin even if you are managing older firmware releases.

The screenshot displays the Barracuda NextGen Admin 7.0 interface. The top navigation bar includes tabs for CONTROL, CONFIGURATION, DATABASE, ADMINS, STATISTICS, EVENTS, and NETWORK ACCESS CLIENT. Below the navigation bar, there are various tool icons such as Status Map, Geo Maps, Configuration Updates, File Updates, Sessions, Barracuda Activation, Floating Licenses, Statistics Collection, Remote Execution, Scanner Versions, and a Filter icon. The main area shows a table of firewalls with columns for Name, Description, Access IP, Version, Country, Appliance, Serial, and Server. The table is organized into folders like 1/BO1-2, 1/Cluster1, 1/HQ, 2/FakeInternet, and 2/OnDesk. The status bar at the bottom indicates the connection details and SSL security information.

Name	Description	Access IP	Version	Country	Appliance	Serial	Server
1/BO1-2			7.0				
BO1-NG1		10.0.11.80	7.0.0-664		VF2000		VIRBO1
BO2-NG1		10.0.11.81	7.0.0-664		VF2000		VIRBO2
1/Cluster1							
CC	The Box Level of this Contro...	10.0.10.70	7.0.0-664				
1/HQ			7.0
