

Web Interface Firmware Update Page

<https://campus.barracuda.com/doc/73719586/>

To keep your CloudGen Firewall up to date, install firmware updates and hotfixes through the web interface. Your firewall automatically receives notifications from Barracuda Networks update servers when compatible updates are available. The firewall shows all available updates in the **AVAILABLE UPDATES** list. Downloading and installing update must be triggered manually.

The screenshot shows the Barracuda NextGen Firewall web interface. The top navigation bar includes tabs for BASIC, NETWORK, FIREWALL, VPN, USERS, LOGS, and ADVANCED. The ADVANCED tab is selected, and the Firmware Update sub-tab is active. Below the navigation bar, there are links for Backups, Licences, Secure Administration, Certificate Manager, Wizards, High Availability, Appearance, Troubleshooting, IPS Exceptions, and Task Manager. The main content area is divided into two sections: AVAILABLE UPDATES and INSTALLED UPDATES. The AVAILABLE UPDATES section contains a table with columns for Scope, Type, Release Date, Name, and Action. Two updates are listed, both with the action 'Download'. The INSTALLED UPDATES section contains a table with columns for Scope, Installation Date, and Name.

Scope	Type	Release Date	Name	Action
Available		2017-04-27T14:22:34+0200	Barracuda NextGen Admin 7.0.2	Install
Available		2017-03-16T18:13:11+0100	Barracuda NextGen Admin 7.0.2	Download

Scope	Installation Date	Name
-------	-------------------	------

Install a Firmware Update Through the Web Interface

1. Go to **ADVANCED > Firmware Update**.
2. Locate the firmware update you want to install and click **Download**. When complete, the action tag **Install** is displayed.

Scope	Type	Release Date	Name	Action
Available		2017-03-16T18:13:11+0100	Barracuda NextGen Admin 7.0.2	Download

3. Click **Install**.

Scope	Type	Release Date	Name	Action
Available		2017-04-27T14:22:34+0200	Barracuda NextGen Admin 7.0.2	Install

4. Click **Accept** to start the installation.

After the firmware update is successfully installed, it is listed in the **INSTALLED UPDATES** list.
