

How to Configure OCSP Validation

<https://campus.barracuda.com/doc/73719703/>

OCSP is not available for direct end user authentication but is used for online certificate verification by the VPN server.

To configure OCSP validation, complete the following steps:

1. Go to **CONFIGURATION > Configuration Tree > Box > Infrastructure Services > Authentication Service**.
2. In the left navigation pane, select **OCSP Validation**.
3. Click **Lock**.
4. Activate OCSP as external directory service.
5. Click **Send Changes** and **Activate**.
