## Threat Logs

<https://campus.barracuda.com/doc/73721397/>

### View and Search Threat Logs

---

To view the Threat Logs for an account, on the **Overview** page, click **Manage** for that account, then do the following:

1. On the **Accounts** page, click **Threat Logs** in the left navigation menu.
2. In the search box at the top, enter an endpoint name, a filename, or leave the search box empty to view all threat logs for the account for the selected date range.

Threats identified by the service are logged by:

- **Date**
- **User**
- **Endpoint Name**
- **Path**
- **Filename**
- **Scan Determination** – *Suspicious, Malicious or Encrypted*. For handling of encrypted or password-protected files, see [How to Set Threat Policies](#).

Click on the *Report* icon in the **View** column to download a scan report showing file metadata, threat analysis, and other details about the file.

To change the date range of the display, select **Last 7 days, Last 30 days or Last 24 Hours** from the drop-down on the upper right of the page.

To change the Threat Logs view, select the number of rows to display using the **Rows per page** drop-down at the bottom of the display.

To export the logs, click **Download CSV**.
