

Compliance Edition for G Suite

<https://campus.barracuda.com/doc/74549992/>

To deploy Barracuda Essentials with G Suite, you must have a G Suite Basic, Business, or Enterprise account. The legacy free edition of G Suite is missing key features required for this deployment. For details on upgrading your G Suite subscription, refer to the Google Support article [G Suite legacy free edition](#).

The articles in this section assume you are deploying the Barracuda Email Security Service *for the first time*. If you previously deployed the Barracuda Email Security Service and wish to migrate to Barracuda Essentials, contact your Barracuda sales representative.

Barracuda Essentials for Email Security provides:

- Critical multi-layer security and compliance for G Suite;
- Effective protection against Spam and Phishing emails;
- Threat detection and message blocking
- Complete email archival for compliance and eDiscovery through granular policies;
- Easy to use applications to access and manage archived email from any device;
- Full functionality free for 14 days.

Barracuda Email Security Service

- Specify the Barracuda Email Security Service as an *inbound mail gateway* so that Barracuda Email Security Service filters out spam and viruses, and then passes the mail on to G Suite.
- Specify the Barracuda Email Security Service as the *outbound mail gateway* so that the Barracuda Email Security Service processes the mail by filtering out spam and viruses before final delivery.

Barracuda Advanced Threat Protection

- Advanced Threat Protection (ATP) protects against advanced malware, zero-day exploits, and targeted attacks not detected by the Barracuda Email Security Service virus scanning features.

Barracuda Cloud Archiving Service

Integrates with G Suite to create a cloud-based indexed archive, ensuring mail is stored securely in a separate repository for as long as needed without risk of deletion.

Where to Start
