## Custom Field Naming Utility and Custom Fields

<https://campus.barracuda.com/doc/76284530/>

### Custom Fields

---

In addition to predefined fields like Company and Phone, Security Awareness Training provides numerous custom fields you can use for your own record keeping. Custom fields are numbered for easier tracking. You can also assign names to custom fields that you can use across all address books and campaigns.

### Custom Field Naming Utility

---

To customize the names of Custom Fields:

1. Navigate to **System > Custom Field Naming Utility**.
2. For each custom field you want to name, enter the following information that displays wherever that custom field appears.
  - **Label** - Text that acts as a caption for that field. It is best to use unique names for each custom field to avoid confusion.
  - **Hint Text** - Descriptive text that appears when the user hovers over the field.
3. Click **Save** to save your changes.
