

Config.reload

<https://campus.barracuda.com/doc/76285056/>

Use this method to re-apply the system configuration, as can be done with the **Reload** button on the **BASIC > Administration** page of the web interface. The output of a successful call is a simple '200 OK' response - results are shown below.

Parameters Allowed

The following variable is used by the config.reload method:

- **password** - A required parameter which the API uses to authenticate access to a page and which is set by your administrator.

Sample Request

```
<?xml version="1.0" encoding="UTF8"?>
<methodCall>
  <methodName>config.reload</methodName>
  <params>
    <param>
      <value>
        <struct>
          </struct>
        </value>
      </param>
    </params>
  </methodCall>
```
