

How to Manage User Access

<https://campus.barracuda.com/doc/76285289/>

This article refers to the Barracuda Message Archiver firmware 5.2 or higher.

The administrator can manage user access from the **USERS > Client Downloads** page:

- **Enable Client Access** – When set to **No**, users can only access messages via the Barracuda Message Archiver web interface. When set to **Yes**, users can access their messages via the [Barracuda Archive Search for Outlook](#) and [Barracuda Archive Search](#), as opposed to logging in to the Barracuda Message Archiver web interface. Additionally, you must enable this feature to allow users to do any of the following:
 - Stub attachments
 - Access stubbed attachments
 - Upload messages for archiving
- **Require Login to View Mail** – Set to **Yes** to require users to log in to the Barracuda Message Archiver web interface to open an attachment from a stubbed message or a message from a policy digest report.
- **Show Microsoft Outlook Add-In** – Set to **Yes** to allow users to view the [Barracuda Archive Search for Outlook](#) feature on their **Client Downloads** page in the web interface.
- **Show Mobile Downloads** – Set to **Yes** to allow users to view the [Mobile Applications](#) options on their **Client Downloads** page in the web interface.
- **Show Stand-Alone Search Utility** – Set to **Yes** to allow users to view the [Barracuda Archive Search](#) feature on their **Client Downloads** page in the web interface.
- **Show IBM Notes** – Set to **Yes** to allow users to view the [IBM Notes](#) feature on their **Client Downloads** page in the web interface.
- **Client Sessions** – Click **Log Out All Clients** to terminate all [Barracuda Archive Search for Outlook](#) and [Barracuda Mobile Application](#) sessions. Once clicked, sessions are terminated and users must log in again.
