

## Overview Page Summary

<https://campus.barracuda.com/doc/76285368/>

The MSP can use the Overview page in the Barracuda Content Shield (BCS) web interface to get a quick summary of threat activity for your accounts. To manage specific accounts, navigate on the global menu bar at the top to **Accounts**.

The Overview page is divided into the following panes. At the bottom of each pane, you can select a time frame.

- **Top Blocked Accounts** - Table showing which of the accounts has seen recent attacks in the time frame. **Count** shows the number of threats in the time frame. **Trend** indicates an increase or decrease in threat activity by percentage. Select a time frame from the drop-down of either the past 24 hours, 7 days, or 14 days.
- **Threats By Accounts** - Graph showing number of total threats detected for each SMB account over the time frame. Select a time frame from the drop-down of either the past 24 hours, 7 days, or 30 days.
- **Threats by File Type** - Graph showing total threats by percentage of each threat type. Hover over each section of the circle to view percentage of detected threats by file type, such as "application/zip". Select a time frame from the drop-down of either the past 24 hours, 7 days, or 30 days.
- **Threats Detected** - Graph showing number of threats over time. Hover over a data point to see number of detected threats. Select a time frame from the drop-down of either the past 24 hours, 7 days, or 30 days.

From the global navigation menu at the top of the page:

- **Audit Log** lists every control that was changed for an account by an administrator.
- **Accounts** summarizes subscription/licenses, agents deployed and list of accounts. This page also has a setting for **Support Access**, which, when turned on, allows Barracuda Support to log in and troubleshoot any issues.
