Adding a Network Location

To add a network location, perform the following steps.

1. Type the network path address in the Path field as shown in the example below.

The screenshot shows a text input field with the placeholder text "Type network location if it is not listed above (for example, \\server\share):". Below this, the label "Path:" is followed by a text box containing the value "\\server\share". To the right of the text box is a dark grey button with a white plus sign (+).

The add button is activated.

2. Click the add  button.
