

## Understanding What Exchange Online Data is Backed Up

<https://campus.barracuda.com/doc/78153957/>

### Exchange Online Hybrid Deployment

Barracuda Cloud-to-Cloud Backup offers limited support for Exchange Online hybrid deployments.

Mailboxes that exist in Exchange Online are protected by Barracuda Cloud-to-Cloud Backup. Mailboxes that exist only in the on-premises environment appear as empty mailbox records in the Cloud-to-Cloud Backup system.

For Exchange Online, Barracuda Cloud-to-Cloud Backup protects all email messages, attachments, and the complete folder structure of each user's mailbox. You can restore messages, folders, or entire mailboxes back to the original account or export via the [download feature](#).

Exchange Online Mailbox	Barracuda Cloud-to-Cloud Backup
 <p>The screenshot shows the Outlook interface for a mailbox. The left sidebar displays the 'Folders' list: Favorites, Inbox (93), Sent Items, Drafts, and a section for 'Shawn Lubahn' with sub-folders: Inbox (93), Drafts, Sent Items, Deleted Items (1), Junk Email, and Notes. The main pane shows the 'INBOX' with a list of emails. The top email is a 'StorageNewsletter' from IBM, dated 9:31a. Below it is a 'Best Buy' email dated 8:44a, followed by a 'Newegg.com' email dated 6:49a. A 'Yesterday' section follows, containing three emails: 'Trace Ronning' (Mon 5:03p), 'StorageNewsletter' (Mon 1:10p), and another 'StorageNewsletter' (Mon 9:34a).</p>	 <p>The screenshot shows the 'Restore Browser' interface in the Barracuda Cloud-to-Cloud Backup console. At the top, it says 'Restore Browser' and shows the email address 'slubahn@...com'. Below, it indicates 'Showing backups from: 2015-07-21 (Today) Change Date'. A tree view on the left shows the backup structure: 'Barracuda Cloud-t...' (expanded) contains 'Office 365', which contains 'Exchange Online', which in turn contains the mailbox 'slubahn@...'. To the right, a 'CONTENTS' list shows the folder structure of the mailbox: Name, Journal, Drafts, Inbox, Conversation Action Settings, Sent Items, Deleted Items, Junk Email, Outbox, and Notes.</p>

To get started, add the [Barracuda Cloud-to-Cloud Backup service](#) and select your [deployment](#).
